1.e4 Roiz,M **1...c5** The Caro-Kann isn't part of Peter's consistent opening repertoire, so this move might have come as a surprise for Michael. **2.Nf3 e6 3.d4 cxd4 4.Nxd4 a6 5.Bd3** This is one of most aggressive ways of handling the positions. In most cases, White should be prepared to sacrifice a pawn. **5...Nf6 6.0-0 Qc7 7.Qe2 d6 8.c4 g6 9.Nc3 Bg7 10.Nf3** The usual approach - White is intending to exchange the ♘f5 in a favourable situation. **10...0-0** The most challenging - since White's king is still in the centre, this standard break is quite effective. **11.h3 Nc6N** No doubt, this innovation was properly explored by GM Svidler before the game. **12.Be3 Nd7 13.Rac1 Re8** This original decision seems risky - there are still many pieces on the board,

so the ♔e7 is not that safe. **14.Rfd1** In his turn, GM Adams fails to extend his initiative properly - the exchanges favour Black in this situation. **14...b6 15.Qd2 Nc5** Now Black's problems are solved. **16.Bb1** This move isn't bad at all, but it is a committal decision - White is giving up a central pawn. **16...Bf8 17.Bh6 Bxh6**

Gibraltar Masters 13th (9) 04.02.2015
[Adhiban,Baskaran]

The Tradewise Gibraltar Chess festival is one of the few of its kind which only gets better every year. The tournament has been organised for nearly a decade, an achievement in itself. For me it was only my second edition, I started with a bang with 4/4 and but then two losses against Nakamura and Naroditsky brought me back to earth :). I was quite optimistic in this round since I had won against him once even though it was blitz. **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 g6 5.c4 Bg7**

11.f3!?N There was also a funny story behind this move. In Aeroflot Blitz in 2012 after making short castling, I anyway went for h4-h5 (please note: without a rook on h1!) and won with a irresistible attack (I will leave it to the reader's imagination as to in which variation it was!). Stockfish 6 64 POPCNT (10s): 'B12: Caro-Kann: Advance Variation ' WIth this last-round win Peter Svidler managed to catch up with his opponent, thus forcing a rapid play-off - which brought him his 5th Russian champion title. **1.e4 c5 2.Nf3 d6** Playing for a win with Black against a strong opponent requires a psychlogically astute opening choice. I thought it would be better not to follow Lputian-Sokolov blindly, so when I saw this plan, I decided to go for it.This is the sort of thing one shouldn't really do this without developing all his pieces, but if you already played h4 on move 10, then it doesn't matter. However, this move isn't totally illogical. White wants to play g4 and ♗g2 instead of placing the bishop on e2. Still, Black seems to be OK after this move. [Sagar,Shah]

An emphatic victory for Anand. Let's have a look at the game to see what really went right for him and wrong for Svidler. **1.e4** Sagar Shah **1...e5 2.Nf3 Nc6 3.d4 exd4** Svidler is one of those top level grandmasters who doesn't like to play the Berlin. He sticks to the normal lines of the Ruy Lopez. **4.Nxd4 Bc5 5.Nxc6 Qf6 6.Qd2 dxc6 7.Nc3 Ne7**

[7...Be6]

8.Qf4 Allowing Svidler to play the Marshall was not in Anand's plans. **8...Be6** Although this is the main move in the position, Anand thought for a good ten minutes. Why? Because Svidler has got this position 13 times in his games and all the while he had chosen b4. Although this is the main move in the position, Anand thought for a good ten minutes. Why? Because Svidler has had this position 13 times in his games and on every occasion he had chosen b4.

10...f5 11.Bd2

[11.Na4 Bb4+ *(11...Bd4)* 12.c3! Bd6 13.e5+- the position is technically winning. It won't be so difficult for a player of Anand's calibre to turn this into a full point. b5 14.exd6 cxd6]

11...0-0-0 12.0-0-0 Rhg8 This is all very

standard Ruy Lopez stuff. Now White must remain consistent and break in the centre with d4. **13.g3 h5** This came as a bit of a surprise to Anand. But Peter was mainly trying to play very concrete chess. **14.Bh3**

[14.Be2 h4 15.gxh4 Rg2]

[14.Bd3 h4 15.gxh4-+ Rh8 was a way to avoid an immediate defeat, but doesn't really serve any purpose as after]

14...h4?! Although this is very thematic. It is extremely dangerous. The main reason being that the two bishops on c1 and c2 are opened up against the black king. **15.Na4 Bf2** This was a critical position where Anand took a lot of time. There are a lot of captures. As Anand correctly pointed out, the main question for him was whether to take on b5 or not. On one hand keeping the a-file closed keeps the rook on the back rank safeguarding it. On the other hand the rook doesn't take part in the game. It is a very difficult decision to make and almost impossible to see what possibilites may arise after say eight to ten moves. But this is where intuition comes into picture and Anand felt that bringing the a1-rook into the game was more important and that explains his next move. **16.Bb4 Rxd1+ 17.Rxd1**

[17.Kxd1! wins! hxg3?? however loses in an amazing fashion. 18.hxg3!! Suddenly the back rank weakness turns out to be the critical factor in the game. Kd8]

17...hxg3 18.hxg3! This move might be natural for a player like Anand, but for us who from a young age are taught about the relative value of the pieces, it is not easy to consider a such a move. Once you see it, though, and you realise that the bishop on e4 will be a complete monster, breathing fire in both directions...

[18.Bxe7+- Like a gentleman Svidler analysed the game with Anand, kept a very calm face in the press conference, and showed great sportsmanship. Anand on the other hand had made his point clear, he was looking for another Candidates victory! gxh2]

18...b5 This is what Svidler had prepared, but it falls just short. **19.Bxe7 bxa4** At this point I went into the tournament hall to check out what exactly was going on. I expected Anand to be looking happy while Svidler would be on the board with his head in his hands. But the scene I saw was completely the opposite. Peter had just captured the rook on a8 and was moving around confidently. Anand on the other hand was nervous, fidgety, biting his nails and looked as if he was the one on the back foot. But it was clear that Vishy was calculating the details of his final attack, anxious to make sure that his opponent had no defensive resources. And in the above position he picked up his knight and made the best move 20. ♘g5! **20.Bxf5!** Svidler came back and saw this move. I thought that he would think for a while before making his move but he blitzed it out. He was showing that he had things under control.

[20.exf5 Bxa2]

20...Bxf5 21.exf5! Once again the only move. There is an attack on both the h7- and f7-pawns. **21...Be3+** This move was also made quickly. **22.Kb1 Rxg3** At this point Peter once again stood up from the board and started walking around. Anand was making his final

calculations, the other players were all coming to the board, disbelief showing in their faces. Nakamura stood right next to Svidler's seat for almost a minute. He just didn't want to leave. He checked the scoresheet, then the board and couldn't believe that Anand was just winning. He went back to his board, Anand lifted his hand and once again made the only winning move in the position. **23.Rd8+!** The rook defends the knight and now the threat is ♕g6. Black doesn't really have a way to stop the attack. **23...Kb7** With the engine on it seems like a trivial win here but on the board when you see moves like ♕e1+ followed by ♘e2, those are tense moments! **24.a3!** Svidler resigned as he saw no point in continuing. His bluff of playing quickly had not worked. Many of you might be wondering why this is the only move. Wouldn't h3 also win? The point is subtle. The h3-square has to be kept for the knight to control g1. **24...Bxf4? 25.Rf8 Be5**

White immediately puts the enemy queenside under pressure. **10...Bf6 11.a4 Bb7N** Black decides to release the queenside tension, hoping to prove that the weakness of the c4-square is only relative. **12.Na3 exd4!?** A brave decision, in the spirit of the Marshall Attack. However, the objective merits of the move are to be proved yet. **13.cxd4** Anand decides to maintain the game in a slow manoeuvring mode. With his last move, he physically prevents the thematical knight jump to a5. This static approach will prove quite unpleasant for Black. **13...Na5 14.Bc2 b4** This seemingly active move does not really cause White any problems with the defence of the f2-square. **15.Nb1 Re8?!** Practically inviting White to play the next move. **16.Bf4±** Once the black queen's bishop has been developed to b7, this standard manoeuvre is quite unpleasant, because the f5-square is undefended. **16...c5 17.Nbd2 cxd4**

[17...Nf8]

18.Bxd6 White only needs one more move (♘f3) to build up an attack with his queen and all the minorpieces against the enemy king. Notably, all Black's minorpieces are relatively uselessly grouped on the other wing. **18...Nc6** This move loses a pawn, but it was hard to give an advice for Black.

[18...d3]

19.Nc4 Nde5 20.Bxe5 Nxe5? 13.Nxd6?! Quite an awkward positioning for this bishop. Usually, it is Black to play ...♗b4 and return to e7 only to force such a move. The bishop on d2 closes the d-file, does not protect e5, and ultimately fails to control a3 - thus allowing Black to potentially take control of the c-file. **13...Qxd6 14.0-0 Bb7 15.Bxb7 Rxb7 16.e3**

The 4...a6-Slav seems to be a common refuge for players whose expectations in the Grünfeld were betrayed by the results, or who simply got fed with it. Kasparov's change of repertoire during his last years of active play is the most notable example and now we see Svidler do the same, at least for this game. The wounds received in the Grünfeld need some time to heal... **5.Bg2** After his loss against Topalov, Bacrot seems to have come to the conclusion that this is the best square for the knight after all. **5...Bb4+!? 6.Bd2 a5 7.0-0 0-0 8.Nc3 d6 9.Re1 Nbd7 10.Qc2 Bxc3 11.Bxc3 Be4 12.Qa4 c5 13.Nh4** #White has obtained a stable advantage of space. It will be quite difficult for Black to break the centre, but on the other hand the fact that he has managed to exchange two pairs of minor pieces makes his position entirely viable. **13...Qc7 14.Red1 Bxg2 15.Nxg2 Ne4 16.Be1 cxd4 17.Rxd4 Ndc5 18.Qa3 f5** This might look like a double edged decision. The queen certainly puts some pressure on the white king side, but it could get into some danger, too. However, the ulteriour course of the game proves that Svidler's evaluation of the situation was correct. **19.f3 Ng5 20.Rad1 Rad8 21.h4 Nf7** #After having activated his position to the maximum, Black threatens to open the position with ...c5 already. This invites White to concrete action. **22.Qe3 Ne5 23.b3**
[23.Nf4 Rfe8 24.b3 Nc6 25.R4d2]
23...Nc6 Black's strong concentration of forces ensures the relative invulnerability of the queen. [34.Bxc5 . The continuation chosen by Bacrot aims to open play in the centre as soon as possible, taking advantage of the fact that the advance of the a-pawn will be more or less useless in case of such a course of events. I do not know whether his decision was dictated by his fear that after repeating the moves once, White would switch to Ree3 or simply wanted to play on a reatively unbalanced position. After 41.Rxd2?! 28.Qd6 Re6 29.Qd5 h5 30.a5 h4 31.Bf2 Still, it's not easy to win as Black's weaknesses (the b6 pawn and White's passed pawn) are close to each other. Do blockading pieces sometimes get tired of their thankless role?

[31...h3 32.g4]

Many players, like, for example, Svidler and Mamedyarov, played the Budapest Gambit when they were young. Especialy it helped him in the last Aeroflot Open. So I decided to go for an unusual for him type of position in which he didn't show up any skills (see the notes to the 4-th move). **3...Bb4 4.e5** This continuation was worked out by my coach Vyacheslav Chebanenco. The idea is to prevent the developement of the bishop on g7. Still nowdays is clear that black can achieve it by pushing his knight first either to e7 or to f6. **4...Ne7 5.a3 Bxc3+ 6.bxc3 c5 7.Nf3 b6**

12.Bf1 Kd7?! 13.g3 Qg8 14.Bh3 Qh7 15.Ra2! Now it's getting clear that since his third move when white decided to adjourn his d pawn march to the forth rank white considerably improved his position while black we can say weakened it. Actualy this is the idea of all close sicilians play that having in mind the capture of the centre one is trying to prepare for it as better is possible. **15...Na6 16.Kf1 Nc7 17.Bf4 Raf8** Now I felt quite comfortable because the position transposed to the g3 line in the Pirc which is familiar to me. [Kasimdzhanov,Rustam]

This is the fourth game of the match in a preliminary stage of the tournament. First 3 games were drawn, with Svidler defending some pretty shaky positions.

18.Bxe4 dxe4?! Maybe slightly inaccurate. **19.Nd2 cxb3 20.Rfb1 Qg6?!** Very natural, but does create weaknesses and ignores the development a bit too much. **21.Rxb3** Now Black has to solve some serious tactical problems.

At the end of this game Magnus still had about 10 minutes, having started with 15. I can't think of many players in history capable of this level at this speed. Very, very impressive stuff.

Candidates Tournament (13) 27.03.2016
[Sagar,Shah]

1.e4 Sagar Shah Sagar Shah Sagar Shah: 'Sagar,Shah Sagar,Shah: 'Sagar Shah" **1...e6 2.d4 d5 3.Nc3 dxe4** Two games in a row for Caruana against the Ruy Lopez. These days it is normal to expect the Berlin starting with 3... ♘f6. But Svidler and Aronian both preferred the standard Ruy Lopez. **4.Nxe4 Nd7 5.Nf3 Ngf6 6.Nxf6+** Caruana plays the 6.d3 variation, the same as he did against Levon Aronian in the previous round. **6...Nxf6 7.Bd3 c5** Threatening ...♘a5 to win the b3-bishop now that the e5-pawn is defended. **8.dxc5 Bxc5 9.Qe2 0-0 10.0-0 b6 11.Bg5 Bb7 12.Rad1** Leko-Caruana and Karjakin-Aronian are the two main games that reached this position. **12...Qc7N** The first new move of the game. But definitely not prepared at home. Both the players were taking quite a lot of time to make their moves. **13.Ne5**

[13.Bxf6 gxf6 14.Be4 Rfd8 15.Bxb7 Qxb7? 16.c3! This is the Philidor position and everything is in place. But can White win within 116 moves? (The fifty move rule). Svidler said during the game that he wanted to get up and sit adjacent to his board because that is the way he had studied this endgame. Sitting at the place where he was did not give the orientation of the board and pieces when he had worked on this endgame at home! Peter has asked many players if it is possible to get up and view the board from the side, but he has not yet received a conclusive answer! Qc7 17.g3 Rxd1 The enemy rook is already on the first rank so it is time to take the rook from one side to the other. 18.Rxd1? This is incorrect. The right way to remember it is the bishop should be defended by the rook. So you should play ♗f2 when your rook is on b2. Rd8 The rook moves to a better square. 19.Ne1? A crucial waste of time. Rxd1 20.Qxd1 Be7 21.Ng2]

13...Rfd8 14.Kh1 Be7

[14...Bd4 15.Rfe1 *(15.f4 Bxb2 16.Bxf6 gxf6 17.Qg4+ Kf8)* 15...Bxb2 16.Bxf6 gxf6 17.Qg4+ Kf8 *(17...Kh8 18.Qh4 f5 19.Bxf5 exf5 20.Nxf7+ Qxf7 21.Rxd8+ Rxd8 22.Qxd8+ Kg7 23.Re7)* 18.Qb4+ Qc5 19.Qxb2 fxe5 20.Rxe5 Qd4 21.Qa3+ Qd6 22.Qb2 Qd4]

15.Rde1 h6 16.Bh4 Caruana isn't interested in going d4 immediately. Instead he tries to strengthen his position with ♘e3. **16...Nd5** Although ♗g5 wasn't such a huge threat, Svidler prevents it.

[16...Rd4 17.f4 Nd5 *(17...Ne4 18.Bxe7 Qxe7 19.Qe3 Rad8 20.Nf3 Rxd3 21.cxd3)* 18.Bg3]

17.Bg3 At first sight this move looks pretty illogical as the knight on g3 is sort of dominated by the pawn on g6. The knight could have been placed better on e3. However, White's idea now would surely be to break in the centre with d4. **17...Bd6 18.Qe4 Nf6 19.Qh4** Caruana is taking it slow. He wants to maintain maximum pressure in the

position before committing to anything. **19...Nd7?!** Peter loses his patience and breaks in the centre but this is exactly what Caruana was looking for. This completely justifies the placement of the knight on g3 as it gets to the e4-square.

However, Svidler was quite depressed at this point, because he had blown a clearly better position. [24...Ne6 25.Bc4!]

25.Bb5+ Bc6 Black is already doing completely fine. **26.Qf5+** Repeatedly moving the bishop from b3 to a4 and back gains nothing. **26...Ne6 27.Bxd6 Qxd6!=** Black has a comfortable position. **28.Rxe6**

[28.Rxe6 The human reaction. Qxe6 29.Bxc6+ Kd6 30.Qxe6+ Kxe6!? 31.Bxa8! What a cool and calm move. Svidler calculates that all the captures lead to an inferior position and just maintains the tension. He now has the threat of taking exd4 and at the same time has prevented d4-d5.]

1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 This move, which characterises the Alekhine Variation, hasn't been covered on Chess Publishing, but Svidler among others has used it to neutralise White's first move initiative. I don't think it fully succeeds but White has to be well prepared to demonstrate that. **4.Ba4 d6** This is my recommendation if Black is happy to draw (and for this reason it has been the main choice at the elite level). E) 17...d5 18.fxg4 must be critical, when Black's point is that after Nxd4 19.Qf2 f6 he has very active piece play for the pawn and can try to regain the a4-pawn. We could compare this with the 6.d3 b5 7. ♗b3 d6 8.a4 variation, except that in some cases (such as the game) White can play d4 in one go. Previously Dominguez had generally gone for the main line or d3-systems against Svidler. **8...bxc6** 3:33 This has been Black's main move in recent games, although White can then try to transpose back to an Anti-Marshall system. **9.Bd3** 25
[9.Qg3]
9...e5 25:24 Black accepts the transposition to the 8.a4 b4 9.d4 d6 Anti-Marshall.
[9...d5= 10.0-0 is best, but once again after *(10.e5!?* White has a small but stable advantage because of the queenside weaknesses. *Nd7 11.Qg3 Qc7 12.f4!* holds together for Black. *0-0 13.0-0 Bc5!?)* 10...0-0 11.e5 Nd7 12.Qg3]

[10...0-0 and Black wants to play ... ♗c6-b5 again. White is still better, but the position is not as clear-cut; probably 11.0-0!? Qe7 12.Bg5! is how White should prosecute his advantage. Qe6 *(12...d6 13.Na4⇄* shouldn't be worse for Black with such a centre. *Ba5)* 13.Bc4! Qd6 14.Rfd1 Nh5 15.Rxd6 Nxg3 16.Rd3]
11.0-0 7 This move has taken over from the old
[11.Qxg7 Rg8 12.Qh6 Rg6 13.Qh4± White is still better, but at least Black has some counterplay. Rg4 might be a trickier defence. 14.Qh6]
11...Nh5 32 Svidler has defended this position on multiple occasions as Black.
12.Qf3 9 This is certainly a very natural move. **12...Nf6** 1:21
[12...Qh4 13.g3-+ Qh3 14.Qg2!

and only then ... ♗b5 is fine. Nf6 15.Na4! will regain the pawn, and after]

13.Qg3 1:55 **Nh5** 2:26 I don't see anything wrong with this move, although it's not needed right away. **14.Qf3** 1:42 **Nf6** 4:56 **15.Na4** 4:46 **Ba5** 7:48

[15...Be6 16.a3 Ba5 Black's position proves fairly robust, though 17.b4! might still keep an edge. White must avoid Bc7?? 18.c4]

16.h3 1:50

[16.a3 0-0 might be playable, but you probably have to be a machine to play like this...and even then, after 17.b4 Bc7 18.Bg5± Black is well short of full compensation. h6 19.Bxf6 Qxf6 is tempting, but after 20.Qxf6! gxf6]

16...0-0 1:55 **17.Rad1** 10:46 **h6?!** 12:05 I think this ambitious move is the cause of Black's subsequent problems.

[17...d5 18.Bg5 *(18.Qg3!? Re8 19.Bg5 Qe7↑* is also in White's favour. *20.b3)* 18...h6 19.Bh4= g5 was Svidler's post-game suggestion, but 20.Bg3 Re8 21.c3]

18.Qg3! 27:01 A very smart decision - the bishop pair will prove a very handy asset in the resulting position. **18...Nh5** 1:53 **19.Qf3±** 29 Black has clear problems here as the queenside pawns are weak and White will later develop play on the kingside with a prepared f4.

19...Nf6 11:57 **20.Bc4** 8:43

[20.Qe2 d5 21.c3 and now the bishop is safe on c8 (from d7, it would be lost to ♕d8). Re8 gives Black fairly easy moves in 22.b4 Bc7 23.Nc5]

20...Bc7 12:23 A good move, offering the a6-pawn as bait. **21.Bc5** 5:59 **Re8** 2:56 Black is angling to exchange the light-squared bishop. Should he succeed, c2 will become weak and Black will be totally fine, so White's reply is practically required.

[21...Qe7 , but I prefer White's move order. 22.Bb6!= is the best move, clearing the way for ... ♘d7-f8 to defend the king. Of course, Rd8 fails to 23.Bxc7 Qxc7]

22.Rfe1 12:04 **Rb8** 1:00 **23.Qa3** 10:10 **d5** 10

[23...Be6 24.Bxa6 d5+- and White simply has too many threats. 25.b4 Nd7 can be inserted first before playing]

24.exd5! 12 White initiates kingside threats with ♗xh6 the immediate idea, but ♕g3 and f4 are also on the cards.

24...cxd5!? 1:08 **25.Bxd5!** 2:44 A very natural move and practically speaking the strongest one as Black's best defence is far from obvious.

25...Nxd5? 7:22 After this loss of time White takes control of the game. I doubt Black really wanted to go for this, but he probably couldn't prove the alternatives were better. **26.c4** 1:36

13.Bc2 Nc8 14.Qd1 Qc7 15.Ne1 Be7 [15...g6 16.g3 Be7!-+ Gofshtein,L 17.Ng2 Rdg8∓ is a couple of tempi down compared to the previous case. After 18.h4 Qd8 Black should be able to create enough counterplay on the K-side before the 'c' pawn gets too close, e.g. 19.Nf3 a6 20.Ne3 Ka7 21.Ng4 h5] **16.f4** This move was mentioned in the very thorough annotations to the game Huebner-Kramnik. It was also the only one which was not even assesed, let alone analyzed, so I should've guessed it will be chosen by my opponent. 'N' Gofshtein,L. **16...f5 17.b3** '?!' Gofshtein, L. **17...cxb3 18.Nxb3 Nc4 19.Nd3 a5 20.Nbc5 Ka7 21.Bb3 N8b6 22.Ra2** At first I thought that I will be able to exploit the position of this Bishop by something like ♕c6 & a5-a4, but the small weakness on e5 doesn't allow for that. After some 25 minutes I found another very fascinating idea. **22...g5!** The more I thought about this move, the more I liked it. Black opens up both of his Bishops, and White's first rank get weak. **23.Qh5** Forced. **23...Be8 24.Qe2 Qc8 25.g4 Bg6 26.Bd1 fxg4** '∓' Gofshtein,L. **27.fxg5 hxg5!** This 'loss' of tempo is actually a very nice move, since after **28.Qxg4 Bf5** Black threatens 29...f3 **29.Qe2? 1.d4 f5 2.g3 g6 3.Bg2 Nf6 4.c4 Bg7 5.Nc3 d6 This continues to be one of the hottest theoretical lines in the English, frequently contested among top-level players. In this game Black strikes back, varying from the game Aronian-So at the recent London Classic (see the January 2017 Update), which favoured White. **6.Nf3 0-0 7.0-0 Qe8** The mainline, although recently Black has been experimenting with the sharper alternative:
[7...c6 8.b3 Qe8 9.Ba3 Na6]
8.b3 Na6 This is the modern trend. The old mainline is: **9.Ba3** White repeats a pair of moves to gain a little time on the

clock. **9...c6 10.Qd3 Rb8 11.e4** Of course this is the main move to play for a win. **11...fxe4** This has some similarities to 7...Nxc1 (see the note to Black's 7th move above) although this version is more solid. Black secures the two bishops at the expense of a lag in development. Another recent game instead saw the unusual: **12.Nxe4 Bf5 13.Nxf6+** Preparing the rook-lift, which has become the standard way for White to develop here.

[14.Qe2 b5 15.h4 Nc7 16.Rad1 Qd7 17.Rfe1 Bg4]

14...Qd7 Black develops modestly, avoiding the queenside expansion we saw in Aronian-So. After castling long, Svidler's king is reasonably safe, which gives him time to work with his long-term assets, the two bishops and White's awkward pawn structure (specifically the backward d-pawn).

15...Nc7 Black prepares to castle long, while putting the queen on an active square. Now White needs to decide whether, and how, to protect the b2-pawn. **16.Re3** The first new move, although it is not clear what this bishop is achieving here. In the game it gets pushed back to the b3-square, where it isn't better placed than it was on the c4-square. Instead:

[16.h4 b5 17.Re3 bxc4 gives Black a crushing attack 18.bxc4 holds on, although Black is clearly better after

16...b5 17.Rfe1 bxc4 18.bxc4 Rb7 Compare this to the position after 20...0-0-0 in Aronian-So (note to Black's 13th move above). With Black's b-pawn on b7 rather than b5, his king is that much safer. **19.h4** An aimless looking move. Instead, White should continue to activate the h3-rook with **19...Rfb8** **20.Ng5?!** Again, it is not clear what this achieves. **20...Rb1 21.Ne4 Bg7** Eyeing the e5-pawn along the 5th rank. **22.Nc3** If instead: **22...Rxe1+** Trading Black's c-pawn for the central e5-pawn. **23.Rxe1 Re8**

1.e4 Fritz's only 1.d4 game in Frankfurt. In our preparations Grunfeld-Indian seemed more promising than the Najdorf, in which Fritz didn't look at all good

against Lutz two rounds earlier. Fritz einzige 1.d4-Partie in Frankfurt. Bei der Vorbereitung erschien uns Grünfeld-Indisch aussichtsreicher als Najdorf, womit Fritz 2 Runden zuvor gegen Lutz schlecht aussah. **1...e5 2.Nf3 Nc6 3.d4 exd4 4.Nxd4 Nf6 5.Nxc6 bxc6 6.e5 Qe7 7.Qe2** A lovely position for Fritz, all pieces are involved and the program can develop its pieces normally. Eine schöne Stellung für Fritz, alle Figuren spielen mit und er kann sich normal entwickeln. **7...Nd5** Forciert das Geschehen. **8.c4 Ba6 9.b3 0-0-0 10.Qb2**

[14...f5]

15.Bxe5 Qxe5 16.Qxe5 Up to here Fritz was still in its openings book. The program plays very well in the resulting position, it can attack the the pawns on a7, c7 and e7, and it has the better king position. This is enough to defeat one of the strongest players in the world. Bis hier war Fritz noch in seinem Eröffnungsbuch. Die entstandene Stellung spielt er sehr stark, er kann die schwarzen Bauern a7,c7 und e7 attackieren und er hat die bessere Königsstellung. Das reicht ihm, um einen der stärksten Spieler der Welt zu besiegen. **16...Rxe5 17.Nf3 Re7 18.Kd2! d5 19.Rae1**

[19.Nxg5]

19...dxc4 20.bxc4 The time has come, the game moves into tactical waters and Fritz can demonstrate its strength. Es ist soweit. Die Partie geht in taktische Gefilde über und Fritz kann seine Stärken ausspielen. **20...g4 21.Nd4 Rd8**

Moscow Tal Memorial 1st (7) 14.11.2006
[Gelfand,Boris]

1.Nf3 Gelfand Gelfand,B Gelfand Gelfand Gelfand Gelfand Gelfand: 'Gelfand,B' Gelfand: 'Gelfand,B Gelfand, B' During recent years in my White games against Peter Svidler we have had a theoretical discussion in the main Gruenfeld 8. ♖b1 system. However, during the recent European club cup, my friend and teammate Alexander Khalifman had told me about some interesting ideas in the Anti-Gruenfeld, which he published in his recent book "Opening for White according to Kramnik-1a", which went out of print in August 2006. Unfortunately, I managed to buy this book only just at the very end of the Tal Memorial... So, the day before this game my second Alexander Khuzman and I had to work hard to develop the ideas mentioned by Khalifman. In meinen Weißpartien gegen Peter Svidler in den letzten Jahren hatten wir eine theoretische Diskussion im 8.Tb1-System der Grünfeld-Hauptvariante. Doch während der letzten europäischen Clubmeisterschaft hatte mir mein Freund und Mannschaftskollege Alexander Khalifman von ein paar interessanten Ideen im Anti-Grünfeld erzählt, die er in seinem aktuellen Buch "Opening for White according to Kramnik-1a" veröffentlicht hatte, das im August 2006 in Druck ging. Leider konnte ich das Buch erst kurz vor dem Ende des Tal-Memorials kaufen. Am Tag vor dieser Partie mussten daher mein Sekundant

Alexander Khuzman und ich hart arbeiten, um die von Khalifman erwähnten Ideen zu entwickeln. **1...Nf6 2.c4 g6 3.Nc3 d5 4.Qa4+ Bd7 5.Qb3 dxc4 6.Qxc4** The bishop on d7 is placed worse than on c8 and this is a point of White's setup. Auf d7 steht der Läufer schlechter als auf c8, und das ist eine Pointe des weißen Aufbaus. **6...a6 7.d4** The most natural continuation in the main line of the Anti-Gruenfeld Die natürlichste Fortsetzung im Hauptabspiel des Anti-Grünfeld.

12.e5! I had to find this strong move over the board, even though it is analysed in Khalifman's book. I had to understand the difference in the bishop's position. The black bishop is on c6, while in the theoretical line of the 5. ♕b3 (1.d4 ♘f6 2.c4 g6 3.♘c3 d5 4.♘f3 ♗g7 5.♕b3 dxc4 6.♕xc4 0-0 7.e4 a6 8. ♗e2 b5 9.♕b3 c5 10.dxc5 ♗b7) variation it is on b7. And it is an important difference. The ♗ is taking the important c6 square from his ♘ and blocking its way to d4. Thus, Black has to develop his pieces more passively and White has time to create weaknesses in his opponent's camp by a2-a4. Diesen starken Zug musste ich am Brett finden, obwohl er in Khalifmans Buch analysiert wird. Ich musste den Unterschied in der Postierung des Läufers versteht. Der schware Läufer steht auf c6, während er im theoretischen Abspiel der Variante 5. ♕b3 (1.d4 ♘f6 2.c4 g6 3. ♘c3 d5 4.♘f3 ♗g7 5.♕b3 dxc4 6. ♕xc4 0-0 7.e4 a6 8. ♗e2 b5 9.♕b3 c5 10.dxc5 ♗b7) sich auf b7 befindet. Und dies ist ein wichtiger Unterschied. Der ♗ nimmt seinem ♘ das wichtige Feld c6 und blockiert dessen Weg nach d4. Somit muss Schwarz seine Figuren passiver entwickeln, und Weiß hat Zeit, durch a2-a4 im Lager seines Gegners Schwächen zu schaffen.

[12.0-0 Nxe4 13.Nxe4 Bxe4 Ü D 97 transposes into one of the main positions of the 5. ♕b3 system, where I have only a general knowledge. 1.Nf3 Nf6 2.c4 c5 3.Nc3 Nc6 4.d4 cxd4 5.Nxd4 e6 6.g3 Qb6 7.Nb3 Gelfand has been prominent in the recent revival of this move. The alternative:

[7.Ndb5 is featured in the Archives, most recently in the 2020 Candidates clash Giri-Nepomniachtchi]

7...Ne5 8.e4 Bb4 9.Qe2 d6 10.Bd2 The modern approach, avoiding the doubled c-pawns (at least for now) and hinting at queenside castling. Instead:

[10.f4 Nc6 11.Be3 Bxc3+ 12.bxc3 Qc7 13.Bg2 0-0 14.0-0 b6 is the old mainline and was featured as such in the old ECOs, but actually (in my database) Black has a plus score in this position! Black's counterplay against White's

queenside has tended to outweigh White's latent kingside attacking chances. As an example of this variation, the 2006 game Carlsen-Volokitin is analyzed in the Archives. In the main game, Svidler gets a similar setup, except with ...a7-a5 instead of ...b7-b6, which helps White more than Black.]

10...0-0 Black usually plays ...0-0 and ...a7-a5 in one order or the other, so there are lots of transpositions possible. Here:

[10...a5 11.0-0-0 (for an analysis of the alternatives see the notes to Navara-Grandelius in the Archives) and now:

A) 11...a4 was chosen by Svidler in an early game in the same match. 12.Na1 0-0 13.Nc2 Bc5 14.f4 Nc6 with a further split:

A1) 15.Be3 when Black has:

A1a) 15...Rd8 16.Bxc5 Qxc5 17.Qe3 trading queens is a safe way to a small plus *(17.g4* going for the attack, is also possible*)* 17...e5 18.f5 Qxe3+ 19.Nxe3 Nd4 20.g4 Bd7 21.g5 Nh5 Gelfand,B (2702)-Svidler,P (2742) chess24.com 2020 1/2-1/2 (39), and here 22.Ned5 gives White a plus, thanks to his space advantage and more centralized forces.;

A1b) 15...Qa5 16.Bxc5 Qxc5 17.Qd2 a3 18.Nxa3 Rxa3 19.bxa3 Qxa3+ 20.Kb1 e5 21.Bd3 and Black didn't get enough for the sacrificed exchange, Gelfand,B (2684)-Tregubov, P (2588) Moscow (Rapid) 2019 1-0 (53);

A1c) 15...a3 16.b3 e5 is a possible improvement, with reasonable counterplay for Black.;

A2) 15.e5 is a little premature, after 15...dxe5 16.fxe5 Nd7 17.Bf4 f6 18.exf6 Nxf6 Black was fine in Navara-Grandelius, which is analyzed in the Archives.;

B) 11...0-0 12.f4 Nc6 transposes to the line give in the note to White's 11th, and is still theoretically crucial.]

[10...Bd7?! allowed 11.f4 Ng6 12.e5 with the initiative, see Gelfand-Nepomniachtchi in the Archives]

11.Bg2 Quite rare in this specific position - White keeps the option of castling kingside. Instead:

[11.0-0-0 and now:

A) 11...a5 12.f4 is the mainline, with theory dating back to the 1980s.

A1) 12...Nc6 13.Be3 Qa6 leads to a critical position which has only been played intermittently over several decades, but featured in a few recent correspondence games. I'm very curious as to what Gelfand had in mind here, since Svidler could have reached this position in the first match game. Now White has 3 main moves:

A1a) 14.Nb5 a4 involves a fascinating queen sacrifice:

A1a1) 15.Nc7 axb3 16.Nxa6 bxa2 17.Kc2 Rxa6 18.e5 *(18.Bg2 e5!* gave Black too much play in the stem game Gleizerov,E (2420)-Dvoirys,S (2520) Cheliabinsk 1989 0-1 (24)*)*

18...dxe5 19.fxe5 Nxe5 20.Bg2 Neg4 21.Ra1 e5 22.Rxa2 Rxa2 23.Kb3 Ra8 24.Kxb4 when a draw seems like the most likely result, although Black eventually won in Kovac,S (2427)-Gebur,T (2420) ICCF email 2016 0-1 (67);

A1a2) 15.Nd2 a3 16.b3 Qa5 17.Bg2 e5 was played in Tukmakov,V (2605)-Berelowitsch,A (2495) Donetsk 1998 1-0 (38). This is given as unclear or better for White in old sources, but modern engines unequivocally favour Black.;

A1b) 14.Na4 e5 gives Black good counterplay, see the entertaining game Marin-Almasi, analyzed by Tony Kosten in the Archives.;

A1c) 14.a4 This looks anti-positional, but aims to simply to stop Black's ...a5-a4 idea, and is less risky than the alternatives This has been played in a couple of correspondence games, for example 14...e5 15.Nd5 *(15.Qc2!?* is a possible way to play with the queens on, for example *Bg4 16.Nd5 Bxd1 17.Qxd1 Bc5 18.Nxc5 dxc5 19.Bxc5* which engines gives as equal, but it is a sharp position where preparation would pay off.*)* 15...Nxd5 16.cxd5 Qxe2 17.Bxe2 Nb8 18.fxe5 Bd7 19.Nd2 Bxa4 20.b3 Bd7 21.Nc4 Bb5 22.exd6 Nd7 23.Kb2 Bxc4 24.Bxc4 Bxd6 25.Bf4 Ne5 with level chances, Feletar,D (2404)-Rach,J (2384) ICCF email 2018 1/ 2-1/2 (30);

A2) 12...a4 13.Na1 *(13.fxe5 axb3 14.a3 dxe5 15.axb4 Ra1+ 16.Nb1 Qa6 17.Qd3 Qa2* is another sharp line analyzed in Marin-Khamrakulov in the Archives. Theory goes a long way here, but the verdict is a draw with accurate play.*)* 13...Nc6 14.Nc2 a3 15.b3 d5 was Morozevich-Grischuk, included in the Archives. Here 16.Nxb4!? is an interesting try, leading to sharp complications.;

B) 11...Bd7 was played by Gelfand himself (again avoiding the above theoretical line) in an OTB game earlier this year. Now 12.f4 Ng6 13.Bg2 e5 14.f5 Ne7 15.g4 Rfc8 16.g5 Ne8 17.Kb1 a5 Esipenko,A (2672)-Gelfand,B (2685) Moscow 2020 1/2-1/2 (66), and now White should continue his kingside play with 18.h4 with an approximate dynamic balance.]

11...a5 Black continues with the queenside expansion, although White cunningly sends his king to the other side. Black has also played:

[11...Qc6 going for the pawn grab 12.f4 Bxc3 13.Bxc3 Nxc4 14.Bxf6 *(14.e5* can be met by *Nd5)* 14...gxf6 15.e5 d5 16.exf6 Kh8 17.0-0 Qb6+ 18.Rf2 Bd7 19.Rd1 Ba4 20.Rd3 Nd6 21.Nd4 with a messy position which is roughly equal, Grigoryev,V (2499)-Zajontz,R (2493) ICCF email 2017 1/2-1/2 (53)]

[11...Bd7 12.f4 Ng6 Allowing White

the time to set up a standard Maroczy bind structure 13.Rc1 Bc6 14.Be3 Qa6 15.Bd2 Qb6 16.Nd4 Rac8 17.Nxc6 Rxc6 18.Be3 Bc5 19.Bxc5 Qxc5 20.b3 Rcc8 21.Qf2 Qa5 22.0-0 and having finally completed development, White has the more pleasant position, Koestner,W (2303)-Almeida,R (2355) ICCF email 2018 1-0 (50)]

12.f4 Nc6 13.Be3 Qc7 Black has also played:

[13...Qd8 Petrosyan,T (2430)-Heimann,A (2591) Barcelona 2017 1/2-1/2 (34), and here White should consider 14.a4 (as in the note to White's 11th) to blockade the queenside.]

14.0-0 Bxc3 15.bxc3 If we compare the position to that in Carlsen-Voloktin after 14 moves (see the note to White's 10th move), here Black has played ...a7-a5 in place of ...b7-b6, so it takes longer for Black to put pressure on White's c4-pawn with ...Bc8-a6. **15...e5?!** After this, White's kingside attack moves quickly. Instead:

[15...a4 is critical:

A) 16.Nd4 Na5 17.c5 Qxc5 18.Rfd1?! *(18.Nxe6 Qc4 19.Qxc4 Nxc4 20.Nc7 Nxe3 21.Nxa8 Nxf1 22.Rxf1* is equal *)* 18...Qc4 and White doesn't have enough for the pawn, 0-1 (35) Harsha,B (2509)-Kozak,A (2503) chess.com INT 2020;

B) 16.Nd2 bolsters the c4-pawn. Now 16...b6 17.g4 Ba6 18.g5 Nd7 19.Qh5 leads to a tense position with attacks on opposite wings.]

[15...b6 here can be met by 16.e5 dxe5 17.fxe5 Nd7 18.Nd4 Bb7 19.Nb5 Qxe5 20.Rad1 with an initiative for White. The inclusion of .... a7-a5 gives White the b5-square and weakens the b6-pawn, which is important tactically in these lines.]

16.f5 b6 17.g4 Ba6 Both players develop their respective attacks logically over the next few moves. **18.g5 Nd7 19.Rf3 Ne7 20.Rh3 Rfc8 21.Qh5 Nf8 22.f6** It turns out that White has better chances by delaying this thrust until more of his pieces join the attack. Instead:

[22.Nd2 Bxc4 23.Nf1! Bxf1 24.Rxf1 is dangerous for Black, for example Qxc3 25.Rhf3 Qc4 26.f6 Now this comes with a big punch, since the rooks have the f7-square in their sights. Neg6 27.fxg7 Kxg7 28.Rxf7+ Qxf7 29.Rxf7+ Kxf7 30.Qd1 and White is much better here, since Black's rooks have not yet been activated, while White's queen and bishops are rampant.]

22...Neg6 23.fxg7 Kxg7 24.c5?! Pre-emptively ditching the pawn to block the c-file, but instead:

[24.Nd2 is still best according to the engines. Now a sample line, purely for illustrative purposes, goes Bxc4 25.Nf1 Nf4 26.Qh6+ Kg8 27.Ng3 Be6 28.Bxf4 Qc5+ 29.Kh1 Qxc3 30.Rg1!! Bxh3 31.Bd2 Bxg2+ 32.Rxg2 Qc4 33.Nh5 Qf1+ 34.Rg1 Qf3+ with a draw by perpetual]

24...bxc5?! The other recapture was better:

Sigeman & Co 28th (2) 05.05.2023
[Svidler, Peter]

This being my first classical tournament since the Grand Swiss 2021, I had a customary (somewhat intentional) quiet first round game vs Mishra, and then had the fun assignment of preparing for a Black game vs Boris. I've been facing that task for far longer than most of the field of the TePe Sigeman 2023 has been alive, and despite that, I tend to fail at it. And so it came to pass. Da dies mein erstes klassisches Turnier seit dem Grand Swiss 2021 war, hatte ich die übliche (etwas absichtliche) ruhige Erstrundenpartie gegen Mishra, und dann die lustige Aufgabe, mich auf eine Schwarzpartie gegen Boris vorzubereiten. Ich stehe dieser Aufgabe schon viel länger gegenüber, als der Großteil des Feldes des TePe Sigeman 2023 lebt, und trotzdem neige ich dazu, dabei zu versagen. Und so kam es, wie es kommen musste. **1.Nf3** Svidler,Peter I was ready to play 1.d4 Nf6 2.c4 d6, so this move is giving me an out - I could still play 1...c5 here, or anything, really. Ich war bereit, 1.d4 Sf6 2.c4 d6 zu spielen, also gibt mir dieser Zug einen Ausweg - ich könnte hier immer noch 1...c5 spielen, oder irgendetwas anderes, wirklich. **1...Nf6 2.c4 d6** But no, I was pretty set on this idea, having noticed that Boris appears to dislike allowing the 3.Nc3 e5 4.d4 e4 lines, meaning I was very likely to get Aber nein, ich war ziemlich auf diese Idee fixiert, nachdem ich bemerkt hatte, dass Boris die Varianten 3.Sc3 e5 4.d4 e4 anscheinend nicht gerne zulässt, was bedeutet, dass ich sehr wahrscheinlich **3.d4 g6 4.Nc3 Bf5** ...this position, in which he has been playing 5.d5 fairly consistently in recent years. Black isn't doing all that hot there, either, but at least I had some kind of an idea there. ...diese Stellung bekomme, in der er in den letzten Jahren ziemlich konsequent 5.d5 gespielt hat. Schwarz steht dort auch nicht besonders gut, aber zumindest hatte ich dort eine Idee. **5.Qb3** Not here though. Aber nicht hier. **5...Qc8 6.h3!** There is really no excuse I can offer for not looking at this before the game, this is far from a novelty, and the

engines love it, too. Es gibt wirklich keine Entschuldigung dafür, dass ich mir das nicht vor der Partie angeschaut habe, das ist alles andere als eine Neuerung, und die Engines lieben es auch. **6...c6?!** There aren't any good choices as such, but this is a little bit too artificial. Leaves trodden paths. There aren't any good choices as such, but this is a little bit too artificial. Es gibt an sich keine gute Wahl, aber das ist ein bisschen zu künstlich. Verlässt die ausgetretenen Pfade. Es gibt an sich keine gute Wahl, aber das ist ein bisschen zu künstlich.

[6...Bg7 7.g4 Bd7 8.e4 0-0 9.Be3 is pretty bad, too - but at least the Black pieces don't get in the way of each other as much here. ist auch ziemlich schlecht - aber wenigstens kommen sich die schwarzen Figuren hier nicht so sehr in die Quere.]

7.g4 Be6 I went for this with some vague dreams of creating enough of the distraction by hinting at b7-b5 to maybe deter Boris from the most straighforward development but it was never going to be a realistic proposition. Ich bin mit dem vagen Traum angetreten, durch die Andeutung von b7-b5 genug Ablenkung zu schaffen, um Boris vielleicht von der geradlinigsten Entwicklung abzuhalten, aber das war nie ein realistisches Unterfangen. **8.e4N**

[8...b5 makes sense - we badly want to trade some pieces off, and deleting parts of White's gorgeous center is extremely important, too - but it just doesn't work tactically macht Sinn - wir wollen unbedingt einige Figuren abtauschen, und auch die Beseitigung von Teilen von Weiß' prächtigem Zentrum ist extrem wichtig - aber es funktioniert einfach taktisch nicht 9.Ng5! 9.Ng5! Very nice move, making sure b5 is unplayable and preparing to grab more space with f4. Sehr schöner Zug, der sicherstellt, dass b5 unspielbar ist, und sich darauf vorbereitet, mit f4 mehr Raum zu gewinnen. **9...c5** Incredibly ugly choice, but I couldn't see any way to not play this. Unglaublich hässliche Wahl, aber ich konnte keinen Weg sehen, das nicht zu spielen.

12.Be3

[The quiet Das stille 12.Bg2 Na6 13.0-0 Nc7 14.a4 leaves Black with very little counterplay, since trying to open things up with exd5 and e6 is very likely to result in White's edge increasing dramatically due to their Bishops getting much more operational freedom lässt Schwarz sehr wenig Gegenspiel, da der Versuch, die Dinge mit exd5 und e6 zu öffnen, höchstwahrscheinlich dazu führt, dass der Vorteil von Weiß dramatisch zunimmt, da seine Läufer viel mehr operative Freiheit erhalten]

12...Nfd7!? I felt like I couldn't wait quietly for White to improve, and decided to try and get the Bishop to d4 asap. Ich hatte das Gefühl, dass ich nicht ruhig darauf warten konnte, dass Weiß sich verbessert, und beschloss, zu versuchen, den Läufer so schnell wie möglich nach d4 zu bringen. **13.f4** Still fine, but based on a miscalculation. Ich wollte 14..Sf6, aber Schwarz hat große Schwierigkeiten sowohl nach 15.Ld3 als auch nach 15.

14...e5 15.f5 a6 since 16.Na3 doesn't look all that hot we're at least forcing White to give us a protected passer on d4 - and perhaps even more importantly, some squares for our knights. Da 16.Sa3 nicht so toll aussieht, zwingen wir Weiß zumindest, uns einen geschützten Freibauern auf d4 zu geben - und, was vielleicht noch wichtiger ist, einige Felder für unsere Springer. **16.Nxd4 exd4** Giving myself the e5 square for the knights, which makes the Kingside a bit more defended, at least optically. Gibt mir das Feld e5 für die Springer, was den Königsflügel etwas besser verteidigt, zumindest optisch.

[16...cxd4 17.Bh6 a5!? was my original plan. I felt like I absolutely don't care about the rook on f8, and the d7 knight belongs on c5, therefore securing it from being kicked with b4 later down the road is very important. However, I became very worried I will get mated on the K side if White keeps the bishop on h6, castles Kingside and just starts amassing the forces to attack my king directly. Looking at it now, with the engine's help, I feel like both parts are sort of true, if that makes any sense: the position is extremely dangerous, but only if White plays very precisely. war mein ursprünglicher Plan. Ich hatte das Gefühl, dass mir der Turm auf f8 völlig egal ist und dass der Springer auf d7 nach c5 gehört, daher ist es sehr wichtig, ihn davor zu schützen, später mit b4 getreten zu werden. Ich wurde jedoch sehr besorgt, dass ich auf am K-Flügel Seite matt gesetzt werde, wenn Weiß den Läufer auf h6 behält, kurz rochiert und einfach anfängt, die Kräfte zu sammeln, um meinen König direkt anzugreifen. Wenn ich mir die Stellung jetzt mit Hilfe der Engine ansehe, habe ich das Gefühl, dass beide Teile irgendwie wahr sind, wenn das überhaupt Sinn macht: Die Stellung ist extrem gefährlich, aber nur, wenn Weiß sehr präzise spielt. 18.Be2 Nc5 19.Qg3!? *(19.Qf3 Nbd7 20.Qg2 Qd8 21.0-0 Qb6* does give Black legitimate counterchances, for example gibt Schwarz durchaus legitime Gegenchancen, zum Beispiel*)* 19...Nbd7 20.0-0 and the idea of landing the queen on h4, and perhaps g5 afterwards, is quite potent, meaning that White can just ignore the fact the e4 pawn is hanging und die Idee, die Dame auf h4 und danach vielleicht g5 zu platzieren, ist ziemlich stark, was bedeutet, dass Weiß die Tatsache ignorieren kann, dass der Bauer auf e4 hängt]

17...Nf6?

[I didn't like Mir missfiel 17...Ne5 18.Bxe5 dxe5 since my knight is still too far away from the action and we've also closed down the best square we had for our knights. It's not a bad general assessment: after da mein Springer immer noch zu weit vom Geschehen entfernt ist und wir außerdem das beste Feld, das wir für unsere Springer hatten, zugemacht haben. Es ist keine schlechte allgemeine Einschätzung: nach 19.fxg6 hxg6 20.g5 , with the h4 and Bh3 follow up, Black is indeed in trouble. However, the text move is worse. mit der Folge h4 und Lh3 ist Schwarz tatsächlich in Schwierigkeiten. Der Textzug ist jedoch schlechter.]

18.Qf3? Continues a sequence of mistakes, but we were both down to below half an hour on the clock, and had to navigate by feel in a very weird landscape - I know I have never seen anything like this structure before, and I suspect neither had Boris Eine Reihe von Fehlern setzt sich fort, aber wir hatten beide weniger als eine halbe Stunde auf der Uhr und mussten uns nach Gefühl in einer sehr seltsamen Landschaft zurechtfinden - ich weiß, dass ich so etwas wie diese Struktur noch nie gesehen habe, und ich vermute, Boris auch nicht

[18.e5! somehow neither of us realized just how strong this is: after Irgendwie war keinem von uns klar, wie stark das ist: nach dxe5 19.Bxe5 Nbd7 the bishop calmly returns kehrt der Läufer in aller Ruhe zurück 20.Bf4 , and Black is just stuck. The only source of 'counterplay' is und Schwarz steckt einfach fest. Die einzige Quelle für 'Gegenspiel' ist b5 but after the simple aber nach dem einfachen 21.0-0-0 it turns out it's all ephemereal, and with Re1 and Bd3 coming in, the position is about to collapse. In more general terms, I think it's completely decisive that Black no longer has access to the e5 square, and there are more files open than you will see in the game. stellt sich heraus, dass alles kurzlebig ist, und mit Te1 und Ld3 bricht die Stellung bald zusammen. Allgemeiner ausgedrückt denke ich, dass es ganz entscheidend ist, dass Schwarz keinen Zugang mehr zum Feld e5 hat, und dass mehr Linien offen sind, als man in der Partie sehen wird.]

18...Nbd7 Now Black is well and truly back in the game Jetzt ist Schwarz wieder voll im Spiel **19.Bd3 b5?!** This looks pseudo-active, but in fact it was cleaner to establish a beach head on e5 before doing this. Das sieht pseudoaktiv aus, aber in Wirklichkeit war es sauberer, vorher einen Brückenkopf auf e5 zu etablieren.

[19...Qc7 20.0-0 Ne5 21.Qg3 Nfd7 would have led to a fairly balanced position hätte zu einer recht ausgewogenen Position geführt]

20.b3 my problem now is that I have keep at least some brain cells occupied by the question 'is my b5 pawn hanging?', while taking on c4 when White can at least consider recapturing with the bishop is potentially not that great either - I would like to have access to the b-file for later. Mein Problem ist nun, dass ich zumindest ein paar Gehirnzellen mit der Frage 'Hängt mein b5-Bauer?'

beschäftigt habe, während das Schlagen auf c4, wonach Weiß zumindest in Erwägung ziehen kann, mit dem Läufer zurückzunehmen, möglicherweise auch nicht so toll ist - ich würde gerne Zugang zur b-Linie für später haben.

20...Rb8 I wasn't at all happy to be spending a full tempo on this in a very concrete position, and having to hope that my indiscretion won't be punished too much. Ich war überhaupt nicht glücklich darüber, dass ich in einer sehr konkreten Situation ein ganzes Tempo dafür aufwenden und hoffen musste, dass meine Indiskretion nicht allzu sehr bestraft wird. **21.0-0 Ne5 22.Qg3?** Harsh to call this a mistake, but it was much more testing to play Es ist hart, dies als Fehler zu bezeichnen, aber viel fordernder war

[22.Qe2! , and Black seems to be a tempo away from achieving the best set up because it turns out that yes, b5 is hanging - and yes, we don't much like the prospect of bxc Bxc4. und Schwarz scheint ein Tempo davon entfernt zu sein, die beste Stellung zu erreichen, denn es stellt sich heraus, dass b5 hängt - und ja, wir mögen die Aussicht auf bxc Lxc4 nicht besonders. bxc4 *(22...Nfd7* runs into trifft auf *23.cxb5!* , and the naive und das naive *Nxd3 24.Qxd3 axb5* loses to verliert wegen *25.fxg6 hxg6 26.e5!; 22...Qd7* is perhaps the best choice, but after ist vielleicht die beste Wahl, aber nach *23.Rac1* , introducing an additional threat of Bxe5, cxb5 and Rxc5, Black will struggle to coordinate his pieces properly mit der zusätzlichen Drohung von Lxe5, cxb5 und Txc5 wird Schwarz Schwierigkeiten haben, seine Figuren richtig zu koordinieren*)* 23.Bxc4 Nxc4 24.bxc4 , and the threat of e4-e5, combined with general weakness of my kingside, give White a very serious edge und die Drohung von e4-e5, kombiniert mit der allgemeinen Schwäche meines Königsflügels, geben Weiß einen sehr ernsten Vorteil]

22...bxc4?! Starting with 22...Nfd7 was much cleaner, but we both thought the text move forces 23.bxc4. Mit 22...Sfd7 zu beginnen war viel sauberer, aber wir dachten beide, der Textzug erzwingt 23. bxc4. **23.bxc4?!**

[It's hard to criticize Boris for not realizing how strong Es ist schwer, Boris dafür zu kritisieren, dass er nicht erkannt hat, wie stark 23.Bxc4! Nxe4 24.Qg2! Nxc4 25.bxc4 Nf6 26.Bh6 Rf7 27.Qe2 was - I don't think it's very obvious at all even when I'm staring the comp evaluation telling me the game is basically lost. Das 'einfache' Problem ist - Weiß wird De6 spielen, und es gibt keine gute Möglichkeit, darauf zu reagieren.]

23...Nfd7 Now Black is doing completely fine, for the first time in the game. The b-file is open, meaning White has to pay at least some attention to the Qside, while creating an attack on the other side of the board is difficult, with the Nd7+Ne5 tandem providing ample cover. Jetzt steht Schwarz zum ersten Mal in

der Partie richtig gut. Die b-Linie ist offen, was bedeutet, dass Weiß zumindest ein wenig auf die D-Seite achten muss, während ein Angriff auf der anderen Seite des Brettes schwierig ist, da das Tandem Sd7+Se5 reichlich Deckung bietet. **24.Bg5** We were both very short on time by the point, and this is a very understandable move, trying to create immediate questions to answer. Wir hatten beide nicht mehr viel Zeit, und es ist sehr verständlich, dass wir versuchen, sofort Fragen zu stellen, die wir beantworten können.

[The engine suggestion Der Enginevorschlag lautet 24.Be2 Rb2 25.Rae1 , completely abandoning the Qside and intending to play g5 and then try to get that bishop to g4, by hook or by crook, is a hard thing to even consider in time trouble , was die D-Seite komplett aufgibt und beabsichtigt, g5 zu spielen und dann zu versuchen, den Läufer auf Biegen und Brechen nach g4 zu bringen - es ist schwer, in Zeitnot auch nur darüber nachzudenken.]

24...Rf7?! This is a good move, but played with a very panicky wrong idea. I left myself less than 5 minutes here, and finally decided on a course of action which gave White a draw if he wanted it, or a mess if he didn't. The engine completely disagrees with this generosity and says 'you're already better, be thriftier' Dies ist ein guter Zug, aber er wurde mit einer sehr panischen falschen Idee gespielt. Ich hatte hier weniger als 5 Minuten Zeit und entschied mich schließlich für eine Vorgehensweise, die Weiß ein Remis gab, wenn er es wollte, oder ein Chaos, wenn er es nicht wollte. Die Engine ist mit dieser Großzügigkeit überhaupt nicht einverstanden und sagt: 'Du stehst schon besser, sei sparsamer'.

[After Nach 24...Qd8! White has no logical ways of continuing to press on the Kside, and has to switch to defense. hat Weiß keine logischen Möglichkeiten, auf der K-Seite weiter zu pressen, und muss auf Verteidigung umstellen.]

25.fxg6 hxg6 26.Rxf7 Kxf7?

[26...Nxf7! 27.Bxe7 Qc7! gives Black a massive edge because even with White to move, the impending Nf7+Ne5 set up covers absolutely everything, e.g. verschafft Schwarz einen massiven Vorteil, denn selbst wenn Weiß am Zug ist, deckt die drohende Aufstellung Sf7+Se5 absolut alles ab, z.B.. 28.Rf1 Nde5 29.Bf6 Qa5! , and despite a very scary looking Bf6, there is just no attack, while the threat of Qc3 basically decides the game. The easiest way to make sure Black isn't worse either is to play Schwarz keine Möglichkeit hat, irgendeinen der weißen Bauern im Zentrum einzusammeln, ohne massives Gegenspiel zuzulassen, aber wir haben schließlich beschlossen, dass es wahr sein muss, und die Engine bestätigt, dass Schwarz hier nicht einmal ein kleines bisschen besser steht, da der Versuch, den c4-Bauern anzugreifen, unweigerlich dazu führt, e4-e5 zuzulassen, oft mit katastrophalen Folgen. Der einfachste Weg, um sicherzustellen, dass Schwarz auch nicht schlechter steht, ist Rb2 34.Qa3 Rb6 , and the queen will have to go back to protecting e4: zu spielen, und die Dame muss zum Schutz von e4 zurückkehren: 35.Qd3 Rb2 36.Qa3 Rb6=]

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 a6 5.Nc3 b5 6.Bd3 Qb6 7.Nf3 Nc6 8.0-0 Qb8 A sensible, fairly-solid choice against this critical test of Black's ambitious 5th move. **9.Re1**
[Grischuk prepares ideas of Nd5 and e4-e5. White can play that advance without delay and 9.e5!? Nge7 *(*prudent *9...Nxe5 10.Nxe5 Qxe5 11.Qf3* looks rather risky for Black, as we've noted before*)* 10.Re1 Ng6 11.Be4 Bb7 12.h4! (this pawn will get to go all the way at first I thought this must promise White the advantage as well as the initiative, but now I'm not so sure) d6 13.exd6 Bxd6 14.h5 Nge7 15.h6 gxh6! (opening lines for a potential counterattack) 16.Bxh6 Qc7 17.Ng5 0-0-0 was rather unclear in Strugnell-David, Malakoff 2011.]
9...Bd6!?
[Quite a radical if not unthematic attempt to hold up e4-e5. As we've seen before, 9...d6 has also been played and in one fairly recent outing 10.Bg5 *(*if *10.Bf4* then *Ne5* of course *)* 10...Be7 11.Qd2 h6 12.Bxe7 Ngxe7 13.Rad1 Ra7 was OK for Black in Martorelli-Olszewski, Italian Team Championship 2011.]
10.e5! A novelty and quite a critical one at that. Indeed, practice has shown that the alternatives shouldn't be too troublesome for Black:
[a) 10.Qe2 Ne5 11.Nxe5 Bxe5 12.a4 b4 13.Nd5 Nf6 14.f4?! Bd4+! failed to impress for White in Kolas-McNab, Hastings 2005/06.]
[b) 10.a4 b4 11.Nb1 Nge7 12.Nbd2 Ng6 13.Nc4 Bc7 has been tested in a few games and seems pretty solid for Black.]
[c) 10.Bg5 Nge7 11.Qd2 Ng6 12.Rad1 Nce5 13.Nxe5 Bxe5 (the correct recapture, preventing White's f-pawn from joining the fray) 14.g3 0-0 15.Be3 Qc7 16.Bf1 Bb7 was also about equal in Barrientos Chavarriaga-Flores, Sao Paulo 2009.]
10...Bc7
[Svidler was playing pretty quickly at this point and may have realised in his preparation that 10...Nxe5? would have been too greedy. After 11.Nxe5 *(11.Be4 Nxf3+ 12.Bxf3 Ra7 13.g3 Nf6 14.Be3 Rb7* may also be good for White as there's no rush to grab the exchange*)* 11...Bxe5 12.Rxe5! Qxe5 13.Qf3 White has a highly dangerous initiative for the exchange. Black can attempt to keep lines closed with d5 *(13...Qe1+?* only helps White somewhat, in view of the line *14.Bf1 d5 15.Qg3* when Black has to resign after *Kf8? 16.Qd6+ Ke8 17.Bg5)* 14.Bf4 Qf6 , but 15.Qg3 leaves his dark squares continuing to look rather tender. The machine points out that h5! is the only move to stay on the board, which can't be a good sign and, indeed, following 16.Nxd5! *(16.h4 Ne7 17.Be5 Nf5* gives White no more

than reasonable play for the exchange in a queenless middlegame) 16...exd5 17.Re1+ (a dangerous-looking idea proposed after the game by various commentators) Be6 (*17...Kd7 18.Be5 Qd8 19.c4!* gives White some attack) 18.Bg5 h4 (or *18...Qxb2 19.Qd6* threatens mate to which there's no defence) 19.Qe3! Qxb2 20.Qc5 Kd7 21.Bf4 Ne7 22.Qd6+ Ke8 23.Bg5 White regains a piece while maintaining a devastating initiative.]

11.Bf4 Nge7 12.Qe2 Ng6 13.Bg3 Bb7 Both sides have developed their pieces along natural lines, but White must be at least a little better here I'd have thought and it's surprising Svidler went in for this unless he had missed White's 10th in his preparation. Black's main problem is that e5 is secure, leaving his queenside pieces struggling to coordinate and influence the game. **14.Rad1** Continuing to calmly build up while preventing Black from castling as the d-pawn would then hang. **14...Nce7**

[This allows White to make a favourable exchange of bishops, but I'm not sure what else Svidler could have done. After, for instance, 14...Qa7 15.Be4 Qc5 16.h4 the pressure would have begun to mount.]

15.Be4! Bxe4 16.Nxe4 0-0!

[Giving up the d-pawn after all, but hoping to trap White's rook. This was a good practical try from the Russian Champion, whereas 16...Nd5?! 17.Rxd5! exd5 18.Nd6+ would have given White excellent play for the exchange, such as with Bxd6 (and not *18...Kf8? 19.Nxf7!* , since *Kxf7* is flattened by *20.e6+ Kf8 21.exd7*) 19.exd6+ Kf8 20.Nd4 followed by Nf5 or even f4-f5.]

17.Rxd7 Nd5 18.Nd6?

[White wants to attack, but this is too ambitious a decision. Svidler's position isn't as bad as it looks. Grischuk must also have looked at 18.Nfg5 h6 19.Nxe6 fxe6 20.Qg4 Qe8 21.Rxc7 Nxc7 22.Nd6 , but Black holds on here with Nxe5 23.Bxe5 Qe7 when White has no more than some play for the exchange.]

[A better way to sacrifice the exchange was 18.Qd3! Qc8 (*18...Qb7 19.Nc3* saves the rook) 19.Rxd5 exd5 20.Qxd5 , as pointed out by Van Delft and Ris for ChessVibes. White has two pawns here, but Black is far from out of the game after Rd8 21.Nd6 (*21.Qb3 Qe6 22.Qxe6 fxe6 23.Nc5 Nf8* keeps everything covered) 21...Bxd6 22.exd6 Qxc2 , strong though the d-pawn appears and slightly shaky the defence after 23.b3! preventing ... Qc4 ideas.]

[I should also point out that 18.Nc3 Nxc3 (*18...Qc8?! 19.Rxd5 exd5 20.Nxd5* looks pretty strong) 19.bxc3 Qb6 20.h4 would have been at least slightly better for White.]

18...Nb6 19.Rxf7 The point of Grischuk's play, but Black has resources. **19...Rxf7!**

[A good choice. After 19...Bxd6 20.Rxg7+ Kxg7 21.exd6 I've no idea what's going on, but Black's position would not have been at all easy to handle in practice, whereas White has some quite simple ways to increase the pressure: Nd4, Ng5 or h4-h5.]

20.Nxf7 Kxf7 21.Ng5+ Kg8

[Heading back to the corner. Instead 21...Ke7? 22.Nxh7 Qg8 23.Ng5 would have left Black struggling to keep White's queen out with Qe4-c6 on the cards.]

22.Nxe6 And so White nabs a third pawn for the piece. Materially he is doing better than in the note to Black's 19th, but crucially Black's king is somewhat better protected. There I rather liked White's initiative, whereas here the position isn't all clear, but if anything it's Black who is slightly better so long as he can find a way to activate his queenside forces. **22...Qc8 23.Qg4 Ra7!**

[Svidler continues to defend calmly and well. Grischuk was no doubt hoping for 23...Qd7?! 24.Rd1 Qc6 25.f4 , involving the f-pawn with a definite initiative.]

24.Rd1?!

[White won't be able to obtain too much down the d-file, so this must be queried. By now I suspect that Grischuk feared the tide was beginning to turn, with 24.f4? Bxe5! 25.fxe5 Re7 a line he had to avoid.]

[However, White most certainly didn't have to collapse as he now did in the game, with 24.h3 Na4 25.Nxc7 *(*better than *25.b3 Ba5 26.Re4 Nc3 27.Rd4 Nf8 28.Nxf8 Qxg4 29.Rxg4 Kxf8* when Black can deal with the e-pawn and is still threatening to check on e2 *)* 25...Qxg4 26.hxg4 Rxc7 27.e6 followed by f4-f5 offering definite chances to resist.]

[Another line in which White retains a rough balance would have been 24.h4!? Na4 25.h5 Nc5 26.Qd4! Qxe6 27.Qxc5 ,]

[and one might also make a case for the prophylactic 24.b3!? .]

24...Na4 Now the initiative is definitely with Black. **25.h3?**

[There's no time to prevent ...Nc5 like this. White had to find the idea of 25.b3 Nc5 *(*or *25...Nc3 26.Rd4 Nxa2* and only now perhaps *27.h3)* 26.Qd4 when Qxe6 27.Qxc5 Rb7 must leave Black slightly for choice, but with White far from out of things after, say, 28.h4 h5 29.Rd3 Ne7 30.Rf3 .]

25...Nxb2 26.Rd5

[Grischuk has completely collapsed. Possibly he had been intending 26.Nxc7 Rxc7 *(*and not *26...Qxg4? 27.Rd8+ Nf8 28.hxg4 Rxc7 29.e6* when White wins*)* 27.Rd6 , only now accepting that Nc4 28.Qxc8+ Rxc8 29.Rxa6 Ncxe5 would have led to a pretty hopeless ending.]

26...Bb6 Now White must either move his knight and consent to a lost ending, or give up further material. **27.Rd6 Nc4 28.Qf5 Rf7 29.Qe4 Nxd6 30.exd6 Nf8** A triumph for defence over the initiative. **0-1**

Svidler, Peter: 'The tournament situation before the last round - Gukesh half a point behind Mishra and me, with Mishra playing his mentor, Boris Gelfand - dictated my opponent will want as sharp of a game as possible. He seemed to favour 1.e4 earlier in the tournament, but as is the case with most of the new crop of superstars, I knew he was capable of playing pretty much anything, and to a very good standard.' Svidler, Peter: 'Die Turniersituation vor der letzten Runde - Gukesh lag einen halben Punkt hinter Mishra und mir, während Mishra gegen seinen Mentor Boris Gelfand spielte - diktierte, dass mein Gegner eine möglichst scharfe Partie spielen wollte. Zu Beginn des Turniers schien er 1.e4 zu bevorzugen, aber wie es bei den meisten neuen Superstars der Fall ist, wusste ich, dass er in der Lage ist, so ziemlich alles zu spielen, und das auf einem sehr guten Niveau.' **1.d4** Svidler,Peter Svidler, Peter **1...Nf6 2.c4 g6 3.f3** Svidler, Peter: 'A very natural choice, since I've been struggling against this line for a while now. You would have thought that is reason enough for me to repeat it before important games, but well, you would be wrong.' Svidler, Peter: 'Eine ganz natürliche Wahl, da ich schon seit einiger Zeit mit dieser Variante zu kämpfen habe. Man könnte meinen, das sei Grund genug für mich, sie vor wichtigen Partien zu wiederholen, aber naja, das wäre ein Irrtum.' **3...Nc6** Svidler, Peter: 'I still believe my choice for the course, 3...d5, is fine - but it's not an easy line to play when you haven't refreshed it in a while, especially against a very well booked up player. 3...Nc6 has been my stand in in recent years, but without much success.' Svidler, Peter: 'Ich glaube immer noch, dass meine Wahl für den Kurs, 3...d5, in

Ordnung ist - aber es ist keine einfache Variante, wenn man sie eine Weile nicht aufgefrischt hat, besonders gegen einen sehr guten Buchspieler. 3...Sc6 habe ich in den letzten Jahren immer wieder gespielt, allerdings ohne großen Erfolg.'

Black's normal response involves allowing e6 dxe6 fxe6, but my own experiences in that structure, and further attempts to analyze it, convinced me I don't much like it for Black. Therefore, I was very much looking for ways to prepare e6 which would allow Black to recapture with a piece beantwortete. Schwarz ist immer noch nicht ganz aus dem Schneider, aber diese Idee erfüllt genau das, wonach ich bei einem neuen Ansatz gegen 3.f3 auf der Suche war. Die normale Antwort von Schwarz besteht darin, e6 dxe6 fxe6 zuzulassen, aber meine eigenen Erfahrungen mit dieser Struktur und weitere Versuche, sie zu analysieren, haben mich davon überzeugt, dass ich sie für Schwarz nicht besonders mag. World Team Championship, Ningbo (4)

[Richard Palliser]

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 a6 5.Nc3 Qc7 6.Bd3 Bc5

[Notably Smirin resisted the chance to develop his bishop thus, preferring 6...Nf6 in another game from the World Team Championship, before springing something of a surprise with 7.Qe2 Bd6!? *(Black traditionally developed in Scheveningen style here - 7...d6* , as in Fedorowicz-Stripunsky, New York 2004, which the Fed annotated at the time *)*

A) some other recent practice has seen 8.Bd2 Nc6 9.Nf3 0-0 10.0-0 Ng4! 11.h3 Nh2 12.Nxh2 Bxh2+ 13.Kh1 Bf4 14.Be3 b5 15.Qd2 Bxe3 16.Qxe3 Bb7 , which seemed OK for Black in Erenburg-Ris, Berkeley 2011,;

B) and the critical 8.Ndb5!? axb5 9.Nxb5 Qa5+ 10.Bd2 Bb4 11.Bxb4 Qxb4+ 12.c3 Qc5 13.e5 , after which Ng4 *(13...Nd5 14.Nd6+ Kf8 15.Qf3 f5 16.Bxf5 exf5 17.Qxf5+ Nf6 18.0-0-0* looks rather dangerous for Black*)* 14.f4 Ra4 *(* if this is best then Black is in trouble and will have to try and make 13...Nd5 work *14...Nh6* would have kept the extra material, but after *15.b4! Qc6 16.Nd6+ Kf8 17.c4* White has a huge bind on the position in return for the piece*)* 15.Qxg4 Qxe5+ 16.fxe5 Rxg4 17.0-0 0-0 18.Rae1 Nc6 19.Re3 and in Grover-Swiercz, Wijk aan Zee 2010, White had

regained his piece while retaining the initiative;

C) 8.Nf3 Nc6 9.0-0 0-0 *(* a novelty and one in a position which had previously enjoyed some high-level testing: *9...b6 10.h3 Bb7 11.Bd2 Ne5 12.Nxe5 Bxe5 13.f4 Bd4+ 14.Kh1 d6 15.Nd1!* intending c3 and Nf2-g4 was perhaps a little better for White in Svidler-Rublevsky, Poikovsky 2005,*;* while in Sutovsky-Ivanchuk, Moscow 2005, the bold *9...b5!? 10.Re1 Ng4 11.Nd5!? exd5 12.exd5+?!* failed to give White quite enough for his piece after *Ne7 13.Bf4 Qc5 14.Nh4 h5)* 10.h3 Ne5 11.Nxe5 Bxe5 12.Bd2 b5 13.f4 Bd4+ 14.Kh1 d6 , reaching a roughly-balanced middlegame in Gashimov-Smirin, Ningbo 2011.]

7.Nb3 Be7 8.0-0 Nf6 9.f4

[White can also begin with 9.a4 before going b6?! *(* I can't say I'm surprised that Hellsten recommends the solid *9...Nc6* here, avoiding White's tricks then *10.f4 d6* would be our main game*)* 10.f4! and after d6 *(* risky, but Anand-Rublevsky, Bastia (rapid) 2004, had shown that *10...Bb7 11.e5! Nd5 12.Nxd5 Bxd5 13.Be3 0-0 14.c4 Bb7 15.Qh5 g6 16.Qh6* is rather good for White, as mentioned by the Fed *)* 11.e5! Nfd7 12.exd6 Qxd6 13.Ne4 *(* White wants to attack, although positional pressure with *13.Be4 Qxd1 14.Rxd1 Ra7 15.Be3* would also have been rather effective *)* 13...Qc7 14.f5!? exf5 15.Bf4 *(15.Nc3!* would have been simple and strong*)* 15...Qc6?? *(*Black had to allow the blow *15...Ne5 16.Ng3 g6 17.Bxf5!* when matters wouldn't actually have been so clear after *gxf5 18.Qd5 f6)* 16.Nd4! and the IM had to give up (1-0) in Doran-Mortazavi, London 2010, in view of Qd5 *(*or *16...Bc5 17.Nxc5 Qxc5 18.Be3* with an overwhelming initiative*)* 17.Nxf5! Qxf5 (there's nothing better with Black so undeveloped) 18.Nd6+ , picking up the queen.]

9...d6 10.a4

[As we last saw in Nepomniachtchi-Karttunen, European Club Cup, Plovdiv 2010, 10.e5! has been looking rather dangerous for Black. Svidler must have had something ready, though, and we'll try to see what it might have been in Diu-Zakhartsov. White's other tries appear somewhat less threatening:]

[a) 10.Qe2 Nc6 *(10...Nbd7* followed by ...b5/...b6 is the alternative*)* 11.Bd2 b5 12.Rae1 Bb7 13.Kh1 *(* it would seem that White has lined up for e4-e5, but after *13.e5 dxe5 14.fxe5 Nd7 15.Bf4 0-0* practice has shown that it's by no means so easy to mate the black king, despite its lack of defensive piece-cover *)* 13...Nd7? *(* underestimating a standard blow Black should have simply played *13...0-0)* 14.Nd5! Qd8 15.Bc3 Bh4 and now in Dragun-Miton, Polish Championship, Warsaw 2011, 16.Bxg7!? Rg8 17.Bc3 Bxe1 18.Rxe1 would have left White with pretty promising compensation for the exchange.]

[b) 10.Qf3 Nbd7 11.Bd2 b6 *(11...b5!?* is also played*)* 12.Rae1 Bb7 13.Qg3 g6 feels like it might be a little better for White if, say, he

shifted the queen to h3, whereas 14.Kh1 Rc8 15.f5? is not the way to go, on account of gxf5 16.exf5? Rg8 and Black won material in Nikolaidis-Mastrovasilis, Greek Team Championship 2011.]

[c) 10.Kh1 Nbd7 11.Qe2 b5 12.a3 Bb7 13.Bd2 0-0 14.Rae1 e5! gave Black easy counterplay after a model set-up (in contrast to White's!), Preethi-Debashis, Bhubaneswar 2011.]

10...Nc6 11.a5 Trying to fix the hole on b6, but of course Black isn't going to tolerate that when he can get his counterplay underway. **11...b5 12.axb6 Qxb6+ 13.Kh1**

[Invariably played, but 13.Rf2!? 0-0 14.Qf3 also deserves attention, and after Nb4 15.Be3 Qb7?! *(15...Qc7* would be normal, holding up e4-e5*)* 16.Na5! Qb8 17.e5 White seized the initiative in Eggleston-Galego, Purley 2011.]

13...0-0 14.Qe2 White hopes that the a6-pawn might become a weakness one day, while supporting the e4-e5 push, but Black too has his trumps here and Svidler now takes steps to remove a key attacking piece. **14...Nb4 15.Be3 Qc7** Very logical play by both sides and unsurprisingly tournament praxis has been here before. **16.Nb5!?**

[This seems to be new and, moreover, isn't mentioned by the generally extremely-thorough Hellsten. Previously 16.Na5 Rb8 *(* the typical regrouping *16...Bd7 17.g4 Bc6 18.g5 Nd7* also seems fine for Black, as mentioned by Hellsten*)* 17.Bd4 e5! and 1/2-1/2 was the rather unhelpful encounter Bellia-C.Horvath, Bratto 2008, in which Black might well have played on. Guseinov's approach appears more critical, although it's worth noting that Black could have avoided it had he retreated his queen to b8 rather than c7.]

16...Qb8 17.N5d4

[The point of White's play. He just wants to improve his knights, whereas 17.Nxd6 Bxd6 18.e5 Nxd3 19.Qxd3 Bxe5 20.fxe5 Qxe5 would only have given him enough initiative to maintain a rough balance, such as after 21.Bc5 Re8 22.Bd4 Qe4 23.Qg3 .]

17...Bd7 18.Nd2 Rc8

[This can't be bad, but I'm not sure why Svidler didn't react to White's calm regrouping with 18...e5!? : for example, 19.Nf5 *(*or *19.fxe5 dxe5 20.Nf5 Bxf5 21.Rxf5 Nxd3 22.cxd3 Qxb2!?* and while White can regain his pawn on e5, that a-pawn might one day become strong*)* 19...Bxf5 20.exf5 Qb7 , fighting for the e4-square with a comfortable game for Black.]

19.c4 Nxd3 20.Qxd3 a5 Black wants to fix a weakness on b2 Guseinov is having none of it, however. **21.b3 Bd8**

[It seems that Svidler wanted to maintain the tension, but this manoeuvre wasn't necessarily best. After 21...a4 22.bxa4 Rxa4 23.Rxa4 Bxa4 the position would have been about equal: for instance, 24.Ra1 Qb4 25.Rb1 Qa5 26.Rb7 Qd8 and while White has activated his rook, Black isn't too concerned with his defences remaining very solid.]

[Moreover, the standard break, 21...d5!? , was available, although after 22.e5 *(22.exd5 exd5 23.Nf5 Bxf5 24.Qxf5 a4* is fine for Black*)* 22...Ng4 23.Bg1 Qb7 24.cxd5! Qxd5

(24...exd5 25.h3 Nh6 26.f5 sidelines the knight*)* 25.Nc4 White begins to exert a bit of pressure.]

22.Bg1 h6

[Another slightly-provocative choice. Instead 22...Bb6 would have been consistent and after 23.N4f3 *(23.Rae1 e5 24.Nf5 Bxf5 25.Bxb6 Qxb6 26.exf5 Qd4!* is a strong resource indicated by the machine after *27.Qxd4 exd4* the front d-pawn lives and both ...a4 and ...d5 are high on the agenda*)* 23...Bxg1 24.Kxg1 e5! the position would have remained about equal.]

23.Rae1 The Azerbaijani Grandmaster decides it must be time to get on with it.

23...a4?

[This definitely goes too far and badly underestimates the potential danger in the centre and on the kingside. After 23...Bb6? 24.e5 Black would have been in trouble too, as Ng4 25.h3 dxe5 26.N4f3! Bxg1 27.hxg4 leaves him with too many loose pieces.]

[However, even now it wasn't too late for 23...e5! , keeping the central situation under control. After 24.fxe5 dxe5 25.Nf5 *(25.N4f3 Be7 26.Qc3 Bb4!? 27.Qxe5 Qxe5 28.Nxe5 Be6* followed by ...a4 looks like good play for the pawn*)* 25...Bxf5 26.exf5 a4 27.bxa4 Rxa4 Black's counterplay arrives in time on the queenside, enabling him to maintain the rough balance.]

24.e5! Beginning a sequence of brutal, Kasparovian blows. **24...Ne8**

[The alternative was 24...dxe5 25.fxe5 , but after Ne8 *(25...Ng4* runs into *26.Qf3 f5 27.Nxf5! exf5 28.Qd5+)* 26.bxa4 play transposes to the next note, *(* and the immediate *26.Qf3* is also possible. *)*]

[and 26...Ba5 27.fxe6 fxe6 28.Qg6! is, of course, the same idea.]

[The engines suggest that 26...exf5 27.Nxf5 Bxf5 28.Qxf5 Rc7 29.e6 f6 was the best that Black could do, but if so then, well...]

27.fxe6 fxe6

[27...Bxe6 28.Nxe6 fxe6 29.Qd7 echoes the game and again wins material for White.]

28.Nf5! Crashing through. **28...exf5**

[Not what Black wanted to do, of course, but after 28...Bc6? 29.Nxh6+! gxh6 30.Qg6+ Ng7 31.Rf7 he would have had to give up.]

29.Qxd7 Bg5 This won't save Black, but what else to do with both the rook and knight en prise? **30.Qxa4 Bxd2 31.Rb1 Qd6?**

[Walking into a pin, but Svidler must have been thoroughly annoyed with

[Varying from the 12...Nf6 of D.Howell (2528) - J.Mestel (2470), 4NCL 2007/08 (1-0 in 31), analysed by Andrew Martin in the Archives.]

13.Nc3 Nce7 This seems like the most harmonious development. Black reinforces his blockade on d5 and frees his knight to come to f6. The bishop might come to c6 on a good day. **14.Ng5**
[White could also start with 14.Ne4 . After Nf4 *(14...Ng6* also looks reasonable*)* 15.Bxf4 Bxf4 16.Nfg5 Bxg5 17.Nxg5 Ng6 Black looks solid, though White can continue as Howell did with 18.h4!?]

14...Nf6 15.Nce4 Nxe4 16.Qxe4 A tough choice.
[16.Nxe4 Rac8 17.Bd2 *(17.Nxd6 Qxd6* is equal *)* 17...Bxh2+ 18.Kxh2 Qc7+ 19.g3 Qxc4 20.Qxc4 Rxc4 21.Bb4 Nf5 22.Bxf8 Kxf8 23.Rac1 Rxc1 24.Rxc1 Bc6 with enough compensation for the sacrificed exchange.]
16...Ng6 17.h4!? Ambitiously playing for the win.
[Howell could have bailed out with 17.d5 exd5 18.Qxd5 Qc7 19.Nxf7 Bxh2+ 20.Kh1 Bc6 and White should take the draw with 21.Nh6+ Kh8 22.Nf7+ Kg8 23.Nh6+]
17...Rac8 18.b3 Qa5 19.Be3 b5
[19...Bc6 20.Qg4 Qf5 also looks like a sound defence.]
20.b4 Qd8 21.Ba2 White has succeeded in outplaying his highly-rated opponent and has very active play.
21...Re8 22.h5 Nf8 23.Rac1 Allowing Black to relieve the pressure.
[23.Qf3 Qf6 *(23...Qe7 24.h6* is very risky*)* 24.Qxf6 gxf6 25.Ne4 Be7 26.d5 exd5 27.Bxd5 and Black will have to suffer to make a draw.]
23...h6! An important move, defending the kingside. **24.Nf3 Rxc1 25.Rxc1 a5 26.Bf4 Qe7 27.Bxd6 Qxd6 28.Qe5 Qa6 29.Bb1 axb4 30.axb4** The position is balanced and a draw is a fair result. **30...Qa3 31.Qe1 e5 32.dxe5 Bg4 33.Be4 Bxh5 34.Bc6 Rd8 35.Ra1 Qb3 36.Rb1 Qe6 37.Rc1 Ng6 38.Qe3 Bxf3 39.Bxf3 Qxe5 40.Qxe5 Nxe5 41.Rc5 Nxf3+ 42.gxf3 Rb8** An interesting theoretical encounter. I like White in most c3-Sicilian IQPs and the one arising after 12...Bd7 is no different.

[Navara,D]

This game is far too complex for me to analyse within a short time. I would gladly leave the task to the author himself. **1.Nf3** Navara,David Navara,David Navara,David Navara,David:

'Navara,D' **1...d5 2.d4 Bf5 3.c4 e6 4.Nc3 Nf6 5.Nh4 Bb4 6.Nxf5 exf5 7.e3 0-0 8.Be2 dxc4 9.Bxc4 c5 10.0-0 Nc6 11.a3 Ba5 12.dxc5 Bxc3 13.bxc3 Qa5 14.Qc2 Qxc5 15.Bd3 g6 16.c4 Ne5 17.Bb2 Nxd3 18.Bxf6 Qc6 19.Bd4 Nc5 20.Rab1 b6 21.Ba1 f6 22.Rfd1 Rac8 23.Rbc1 Rc7** The position is approximately balanced. White's weakness on c4 is being compensated for by the potential vulnerability of Black's king. **24.Rd5?**

[24.h3 would maintain the equilibrium.]

24...Nb3! White must have missed this nice trick. Now he loses a pawn. **25.Rcd1**

[25.Qxb3? Qxd5-+]

25...Qxc4∓ Black's technical task is far from easy. He should exchange as many pieces as he can, create a passed pawn and promote it or give it up for White's kingside pawns, but that is easier said than done. **26.Qb2 Qc2 27.R5d3 Qxb2 28.Bxb2 Nc5 29.Rd4 Kf7 30.h3 h5 31.g4 hxg4 32.hxg4 fxg4 33.Rxg4 Rd7 34.Rxd7+ Nxd7 35.Ra4 a5 36.Rd4 Ke6 37.Rg4 g5 38.Re4+ Ne5! 39.Kg2 Rc8! 40.Bxe5 f5!** Black keeps his kingside pawns intact, thus depriving White's rook of targets and good squares. **41.Rd4 Kxe5** Black has a spare pawn and his pieces are more active than White's. The conversion still requires good technique, which GM Svidler readily demonstrated. **42.a4 Rc2** The rook heads for b4. **43.Rd8 Rc4 44.Re8+ Kd6 45.Rd8+ Ke5 46.Re8+ Kd5 47.Rd8+ Kc5 48.Rf8 f4 49.Rf5+ Kc6 50.Rxg5 fxe3 51.fxe3 Rxa4 52.Kf3 Rc4 53.e4 a4 54.Rg7 b5 55.Ra7 Kc5 56.e5 Kd5** This was an instructive game which certainly deserves a more detailed analysis. **0-1**

19.Ng4 Nxg4 20.hxg4 d5!N Svidler's improvement over the previous games, which seems like the only way for Black to fight for equality in this old line.

Astrakhan FIDE GP (13) 24.05.2010
[Inarkiev,Ernesto]

The game is a good example ofl the problems of both the defence, and the technique of converting an advantage. It was played in the last round, and we didn't manage to avoid the mix of good moves and mistakes, but there are no silly mistakesl. I hope that the notes will help you to sense the tension which is there in all the Grand Prix tournaments. **1.d4** Inarkiev,E Inarkiev In the second half of the tournament, I had scored only 0.5 out of three games with 1.e4, so I decided to switch openings. **1...Nf6 2.c4 g6 3.g3 c6 4.Nf3 Bg7 5.Bg2 d5** During recent years, Peter has more often played this line against the Fianchetto Variation. **6.Qb3 0-0 7.0-0 Qb6 8.Nc3 Rd8** Today this move is more popular

[The main line is 8...Bf5]

9.Rd1 A rare move, but this couldn't have come as a surprise to Svidler, because I had already played it against him! **9...Bf5**

[In that game, Black already made a serious mistake here: 9...Na6? after 10.Qxb6 axb6 11.Na4!± White has a big advantage, and Black gave up the pawn in order to complicate the game dxc4 12.Nxb6 Ra7 13.Nxc4 Be6 and after some adventures Black saved the game. ...1/2 Inarkiev,E (2628)-Svidler,P (2750)/Moscow 2006/ CBM 116 (35)]

10.Ne1!? White keeps the tension in the centre. Obviously, the main difference in the positions of bpth sides is that the white pawn is on c4, and Black's one is on c6. This led White to place the pieces on more active positions. **10...dxc4!?** After about 30 minutes of thinking, Svidler finds an interesting novelty.

[In the only game, which was played in this position before, Black chose 10...Be6 and soon equalised. 11.c5 Qxb3 12.axb3 Nbd7 13.b4 a6 14.h3 h6 15.Ra3 Ne8 16.g4 Nc7= Anic Darko (FRA) 2487 - Nataf Igor-Alexandre (FRA) 2526, Vichy (France) 2000 (48)]

11.Qxc4 Na6 This position is more complicated than the endgame. White has a space advantage - the pawn on d4 is strong, but Black has a development advantage, and is ready to seize the initiative. **12.e4!** White increases the advantage in the centre.

[There's no good way to play more quietly. If 12.e3?! then e5! 13.Nf3 *(*worse is *13.dxe5 Ng4∓)* 13...exd4 14.Nxd4 Bg4↑]

12...Bg4 A very natural move. Black moves the bishop with tempo, and tries to provoke the weaknesses in White's camp. Almost everyone will play this move more or less quickly, but here it's not so simple, because different moves of the bishop lead to completely different positions. So, maybe you should try to look deeper.

[An alternative is 12...Be6!? in comparison with the game, White doesn't control the g4-square.]

13.Bf3 Defending the rook and atacking the bishop. I like this move more than others.

[There's no trouble for Black after 13.Nf3?! Qb4! *(13...e5?* doesn't work here because of *14.Nxe5!±* and Black can't take the

rook *Bxd1 15.Qxf7+ Kh8* and now the nice blow *16.Bh6!+- Bxh6 17.Qxf6+ Bg7 18.Nf7+ Kg8 19.Qe6+-;* Also bad is *13...Nb4?* because ... ♘c2 is not a threat, and White can simply play *14.a3!±* and if *Nc2?* then *15.Na4+-)* Now White has to chose, to play the endgame with a slight initiative for Black, or to sacrifice the pawn for the initiative. 14.Qe2!? *(*or *14.Qxb4 Nxb4↑)* 14...Bxf3 15.Bxf3 Rxd4 16.Rxd4 Qxd4 17.Be3 Qe5 18.Rd1⩲ Two bishops give enough compensation for the pawn, but it is White who should concentrate on getting equality.]

[Less clear is 13.f3!? the position is complex, but Black has pleasant choices here. Very few players would like to play such a move without having to. Be6 14.Qa4 Nb4!? 15.Be3 Ne8 It seems, that there's no way to save the d4-pawn, but suddenly, the advantage in the number of attackers is not enough to win it. 16.Bf1! Here Black can choose according to taste; I prefer

A) The move 16...Bxd4? doesn't work because of 17.Rxd4! Rxd4 18.a3! and it's Black who will lose the material. c5 19.axb4 Rxb4 20.Qc2!?± Rxb2 21.Na4 Qb3 22.Qxb2 Qxe3+ 23.Qf2 Qxf2+ 24.Kxf2 Rc8 25.Nd3±;

B) But, Black has the very interesting sacrifice 16...Rxd4!? 17.Bxd4 Bxd4+ 18.Kg2 *(18.Kh1!?)* It seems, that Black just has a normal position anyway. For example: 18...c5 *(* More aggressive is *18...a5!? 19.a3 Bg1!* for example: *20.Kh1 Qf2 21.Bg2 b5! 22.Nxb5 cxb5 23.Qxb5 Na2!∞* and the battle is just at the beginning.*)* 19.Nc2 *(*If *19.Nb5?!* then Black can take the pawn *Bxb2! 20.Rab1 Bg7* and if *21.a3* then *Na2!∓)* 19...Nxc2 20.Qxc2 Nd6⩲ And the bishop on d4 is not weaker than the rook.;

C) 16...Nxa2!? 17.Nxa2 Bb3! 18.Qa3 Bxd1 19.Rxd1 Bxd4 and Black has good chances with rook and two pawns against two pieces 20.Rxd4!? Rxd4 21.Nc2 e5∞]

13...Be6?! Now it's just the loss of important tempo.

[The most simple and natural is 13...h5!? it's important to get the control over the g4-square, also it's a kind of prophylactic against ♗xg4- ♘xg4- ♕e2. Now White has different moves, but none of them can give him the advantage. For example:

A) 14.Rb1?! (Δ♗e3) is inaccurate: Be6! 15.d5 cxd5 16.exd5 Bf5! 17.Ra1 Ng4∓;

B) 14.Kg2 is interesting, but the pawn on h5 changes the situation Be6! 15.Qa4 *(*worse is *15.d5* here, because of *cxd5 16.exd5 Bf5!∓* and Black has the important ♘g4 all the time. For example: *17.Qe2 Nc5 18.Be3 Ng4!)* 15...Ng4!? 16.Nc2 c5 17.d5 Bd7 18.Qb3∞ White keeps the centre, but Black's pieces are active enough.;

C) White can also develop the bishop on f4 14.Bf4!? for example: Be6!? 15.d5 cxd5 16.exd5 Bg4!∞ The pawn on h5 helps again.;

D) 14.Be3 Bxf3 15.Nxf3 Ng4∞ Black will take the bishop, but this

will strengthen White's pawns in the centre.]

[Less clear but strong enough is 13...Bh3 (Δ ♘g4). Now, again White has to give up something to finish development. 14.Bf4!? *(14.e5?! only weakens the centre: Be6! 15.Qe2 Nd5∓ 16.Bg5 Nac7;* Possible is *14.Na4 Qb4 15.Qxb4 Nxb4 16.Nc3 Ng4* It seems, that White is in trouble, but actually not *17.a3! Na6 18.Nc2* and White protects the centre, but Black has good play *e5 19.d5 Nc5∞;* White also can try to take more space with *14.a4!? Qb4 15.Qxb4 Nxb4 16.a5∞)* 14...Ng4 15.Qe2 h5! 16.d5∞ A necessity, which lets White hold the control over the centre, but obviously Black is OK.]

14.d5! Now, Black is in trouble. It's already not easy to defend, but the task is twice as hard when you realise that just one move before you had an unclear position. **14...Bg4?!** Of course, normally, Black would like to determine the position in the centre, but here it looks dangerous. Still, it was necessary to calculate it

[After 14...cxd5! 15.exd5 Bf5 16.Qe2 the position is unpleasant, but Black has a concrete way to keep his pieces on normal positions. Nc5! 17.Be3 Qa5! and the position is just slightly better for White. 18.Bd4 *(If 18.Rd4* then *Qa6!±; Or 18.Rac1 Rac8!?±)* 18...Rac8±]

15.Bxg4?! This is not precise enough, and lets Black construct a defence.

[The natural 15.Be3! is very strong. The critical move here is

A) 15...Qb4? Simply loses the pawn. 16.Qxb4 Nxb4 17.Bxg4 Nxg4 18.Bc5±;

B) The story is similar after 15...Qa5? 16.dxc6± bxc6 17.Rxd8+ Rxd8 18.Qxc6±;

C) 15...Qc7? doesn't help either: 16.dxc6 Bxf3 17.Nxf3 Qxc6 18.Rxd8+! Rxd8 19.Qxc6 bxc6 20.Bxa7±;

D) The only way not lose the material immediately is 15...c5 but after this move White has a big advantage in the centre. For example: 16.e5!?± *(Also strong is 16.Qe2!? Bxf3 17.Nxf3±)* 16...Bxf3 17.Nxf3 Nd7 18.e6!? *(*Also possible is *18.Bf4!? Qxb2 19.Rab1 Nb6 20.Rxb2 Nxc4 21.Rxb7±)* 18...Qxb2 19.exf7+ Kh8 20.Rac1± The knight will come to e6 very quickly.;

E) 15...Qxb2!? Maybe this is not the best move, but in other lines White can get an advantage without too much tension. 16.Rab1 Qa3 It's important, that White has the very strong

E1) Less clear is 17.Rxb7 cxd5 18.Nxd5 Nxd5 19.Rxd5 Rdc8± For example: 20.Qb3! *(* The advantage is dwindling after *20.Qd3?! Qxd3 21.Rxd3 Be6 22.Rxe7 Nc5⇄;* Or after *20.Nc2?! Rxc4! 21.Nxa3 Bxf3 22.Nxc4 Bxe4 23.Rdd7 Bxb7 24.Rxb7 Bf6±* And Black should hold the position.*)* 20...Qxb3 21.axb3 Be6 22.Rdb5± Here White has serious chances, but Black can defend.;

E2) 17.dxc6! bxc6 18.e5!± Exploiting the lack of coordination in the black army; now Black is very close to

catastrophe. With the queen on a3 and the knight on a6, the tactic should work for White.

E2a) 18...Bxf3 just loses: 19.Rxd8+! Rxd8 20.exf6 Bxf6 21.Nxf3 Bxc3 22.Rb3+-;

E2b) More complicated, but also bad is 18...Be6 19.Qxc6 Nd7 *(If 19...Rdc8 then suddenly 20.Nc2!+- Qa5 21.Rb5 Qxc3 22.Qxc3 Rxc3 23.Bxa8+- Ng4 24.Rd8+)* 20.Nc2! This is an important resource Nxe5 *(or 20...Qa5 21.Rb5+-)* 21.Nxa3 Nxc6 22.Bxc6 Bxc3 23.Bxa8+- Rxa8 24.Nb5 Bf6 25.a3!?+-;

E2c) 18...Nd5 White wins the pawn, and also has the initiative. 19.Nxd5 Bxf3 20.Nxe7+! Qxe7 21.Nxf3 Nc7 22.Qxc6±]

15...Nxg4 16.Qe2 The queen comes to a more comfortable position. **16...Ne5**

[Here another interesting move is 16...h5!? 17.Bg5 Bf6 18.Nf3±]

17.Bg5± White has got a comfortable advantage - more space in the centre, and Black doesn't have active counterplay. White's main threat is ♗e3 and after that f2-f4. The goal of the last move is by attacking the e7-pawn, to force Black to worsen the position, and, only after that, come back to the main plan.

[The immediate 17.Be3!? is also possible Qb4 18.Rd4 Qb6 19.Rad1±]

17...Qc5

[On 17...Re8 White will play 18.Be3±]

18.Rac1 Exploiting the problem underlying the last black move.

[Here Black was prepared for 18.Be3 Qc4!∞]

18...Re8

[18...h6?! doesn't work: 19.dxc6! Qxc6 *(Of course not 19...hxg5? 20.cxb7+-; If 19...Nxc6 then 20.Nd5±)* 20.Bxe7± White simply wins the pawn. Rxd1 21.Rxd1 Nc4 22.Rc1 Qe6 23.Nb5!±]

19.dxc6 I decided to simplify the position, and to fix my edge. Probably, White can count on a bigger advantage than in the game.

[Weaker is 19.Be3?! Qc4±]

[But White can do one more preparatory move 19.a3! Qc4 Necessity *(If 19...Qa5 then 20.Be3± (Δ f4).; Also bad is 19...h6? 20.dxc6! Qxc6 21.Nd5 Qe6 22.Be3!* and Black is in big trouble. *Nc6 23.b4!+-)* 20.f4 Qxe2 *(But 20...f6?* doesn't work: *21.fxe5 Qxe2 22.Nxe2 fxg5 23.dxc6 bxc6 24.Rxc6 Nb8 25.Rc5+-* White is a pawn up in a much better position.*)* 21.Nxe2 Ng4 22.dxc6

A) Or 22...Bxb2 23.cxb7! Bxc1 *(If 23...Rab8?* then *24.Rc6+-)* 24.bxa8Q Be3+ 25.Kg2 Rxa8 26.Bxe7±;

B) 22...bxc6 23.Rxc6 Nb8 24.Rc5 Bxb2 25.Rd3± With a big advantage, because almost every black piece is in an awkward position.]

19...Nxc6 20.Rd5 This is the point; White starts the pursuit of the queen.

[The alternative is less clear: 20.Nd5 Qa5 21.a3 for example: h6!? 22.Be3 e6! 23.b4 Qxa3 24.b5 exd5 25.bxa6 Na5!? 26.Rxd5± White still has a solid advantage, but a lot of exchanges have increased Black's chances of a draw.]

20...Qb6
[20...Qb4 Just losing the tempo, after 21.Nd3± Black will anyway have to play Qb6]
21.Be3! Forcing the black queen to hide in the corner of the board. **21...Qc7 22.Nb5 Qb8**
[22...Qc8 Losing the pawn 23.Nxa7! Qe6 24.Nxc6 bxc6 25.Ra5±]
23.Nd3 This is the position, which I wanted when was playing 19.dxc6. White is clearly better: the rook on a8 and knight on a6 are just terrible. At the same time, White's pieces are quite active but Black hasn't any weaknesses and that is why White can't get something concrete immediately. **23...Rd8** Peter played the next part of the game very well; in a dangerous position, he managed to find the moves which maintained the tension.
[If Black tries to exchange pieces 23...Nc7 then White will destroy Black's structure 24.Nxc7 Qxc7 25.Nb4!±]
24.a3 There's no direct way, so White should impede Black in the activation of his pieces. In the next part of the game, we both were under time pressure, I had about 15 minutes till the time control, my opponent had about 25 minutes, which is not too much, because in the Grand Prix series there's no increment after each move. **24...e6 25.Rxd8+** I played this and the next few moves quite quickly.
[The computer suggests an interesting option 25.Bf4!? White wants to get something from the exchange of the rooks, because Black needs this exchange. Qc8 *(*Worse is *25...e5 26.Bg5±)* 26.Rd6!± This is the point, if Black takes on d6, knight will come to d6, and it's obvious, that this will improve White's position. But what if Bf8 ? Here White has a nice tactic 27.Ne5! destroying Black's position, because if Bxd6 then 28.Nxc6! bxc6 29.Nxd6± Of course, to play or even just to think about this, you need time.]
25...Qxd8 26.b4± The exchange of the rooks, doesn't change the situation too much, because the rook d8 was not the bad piece in Black's camp, but it's in Black's favour for sure. **26...Qe7 27.Kg2** The advantage of this move is, that you can play it quickly. At the same time, it's not clear, how White should exploit his advantage. **27...Nab8!** Black decides not to wait till White starts the assault, and tries to improve the position. **28.e5!** It's important to achieve something, before Black coordinates his forces.
[White still can't organize an invasion: 28.Rd1 Nd7 29.Nc5 Nf8±]
28...Nd7 Peter spent half of his time on this move, and after it we both had about 10 minutes left. Obviously, Black would like to use some tactics to make the defence easier, but that moment hasn't come yet. Let's check, what can Black try.
[The most simple is 28...Nxe5? 29.Rc8++-]
[Or 28...Bxe5? 29.Nxe5 Nxe5 30.Rc8+ Kg7 31.Bd4+-]
[During the game, I was thinking about the 28...Qd7 (Δ ♕d5). 29.Nd6! is critical *(29.Nc5* is also possible *Qe7 30.f4±* but Black still can fight. *a5)* 29...Bxe5 This was the point of the previous move, but this weakens the black king, and after 30.Nxe5 Qxd6 31.Ng4!+- Black is defenceless.]
[The real alternative is 28...a5

but this suddenly helps White, because now White will have clear objects to attack. 29.Nd6! axb4 30.axb4 Nd7 *(*Once more *30...Bxe5?* is bad; now White has *31.Nc8! Qc7 32.Nxe5! Qxe5 33.b5*+- and Black loses the piece. *Nd4 34.Ne7+)* 31.f4+- The threat b4-b5 is very strong. f6 32.b5 Now we can feel the danger of the position, and how it's unpleasant for Black.]

29.f4 f6! Black can't ignore the pawn on e5, because it's like a Trojan Horse which will help White to come into the city. **30.exf6**

[The interesting alternative is 30.Bc5!? Nxc5 31.exf6! Bxf6 32.Nxc5 This is the point, White starts the attack of the Black weaknesses immediately. The question is, what if a6 *(* Black can't protect the pawn *32...Re8 33.Qe4*+- (Δ♘ b7) *;* Maybe the best chance is *32...Nd4!? 33.Nxd4 Bxd4*± but White has a pleasant choice as to how to take the pawn. *)* The key move is 33.Nxb7! and White wins the pawn, and the pawn on e6 is still weak. axb5 *(* If *33...Qd7* then *34.Rd1!*+- *)* 34.Rxc6+-]

30...Nxf6 31.Nd4?! Besides the better structure, White has a serious initiative, but White must try to use it before Black develops the rook. The text move, helps Black.

[It was necessary to find 31.Bc5!

A) Probably better is 31...Qf7 but here White has a good choice. 32.Re1± *(*also *32.Nd6!?;* or even *32.Bxa7!?)*;

B) 31...Qd7 and now 32.Bd6!± (Δ ♘c5, Δ ♘e5) , and White has dangerous threats. For example: Re8 33.Ne5 Nxe5 34.Rc7 Qd8 35.Bxe5±]

31...Nxd4 32.Bxd4 Of course, White still has a serious advantage, but at least, all the black pieces will be in the game soon. **32...Qd7 33.Bb2 b6**

[33...Qd5+ doesn't change much: 34.Kg1 Re8 for example: 35.Nf2 Re7 36.Rd1 Qc6 37.Bd4! a6 38.Qb2 Rf7 39.Be5±]

34.Kg1?! Once again, White doesn't try to seize the initiative.

[White could start the attack immediately 34.Ne5! Qd5+ 35.Kh3!± (Δ ♖c7). For example: a5 36.b5! Rd8 37.Rc7±]

34...Rd8 Here we both had about 5 minutes.

[If 34...Rc8 then 35.Rd1! the exchange of the rooks is in Black's favour.]

35.Re1?! The rook is well placed on the c-file.

[⌓35.Nf2!]

35...Ne8! Black exchanges one more piece. **36.Nf2** White should be accurate to avoid further simplifications.

[For example: 36.Bxg7 Qxd3! 37.Bb2 Qxe2 38.Rxe2 Kf7±]

[Or 36.Ne5 Qd2!± 37.Nc6 Qxe2 38.Rxe2 Rd1+ 39.Kf2 Bxb2 40.Rxb2 Rh1 41.Kg2 Ra1±]

36...Bxb2 37.Qxb2 Kf7 38.Ne4 Actually this is again an inaccuracy, but this move provoke Black into a weakness, which finally helped White to destroy Black's position.

[⌓38.Rd1 Qe7 39.Nd3±]

38...h6 Black can't avoid this move.

39.Nf2 Nf6 The lost of tempi gave Black time to consolidate his position, and the activity of his pieces should be enough to cover the kingside. But on the last move before time control we both had 1

minute. **40.Qe2 Qd6?** A serious mistake. Peter had worked hard and almost equalised, but after this move Black comes back to an unpleasant position again; but the mistake is avery likely one to make when you are in time trouble.

[Black shouldn't give White time to attack the kingside, and here was the right moment to start counterplay 40...Rc8! suddenly, Black's pieces become very active. 41.Rd1 *(Or 41.Qe3 Rc2 42.Qb3 Rd2∞* and Black is no worse.*;* If *41.Nd3* then Black has at least a repetition *Qd4+ 42.Kf1 Qd5=)* 41...Qa4 this is more direct move *(* not worse is *41...Qc6∞ 42.Nd3 Qc3)* 42.Rd3 *(* White can sacrifice the pawn *42.Nd3!? Qxa3∞* but here the play will continue wit all three results possible. *)* 42...Rc1+! 43.Kg2 Rc2 44.Qf3 Nd5∞ and Black has enough counterplay.]

41.Rd1! Now White seizes the initiative, and didn't let it go till the end of the game. The final part of this game was my part. **41...Nd5?!** Black doesn't want to go into the deep defence, but the knight on f6 was protecting important squares. After the game, Peter said, that he chose this move, because he didn't like the others.

[More stubborn is 41...Qe7 42.Nd3 Kg7 but Black has to be ready for hard defence. 43.Rc1! *(* The exchange of the rooks is again in Black's favour *43.Ne5?! Rxd1+ 44.Qxd1 Nd5±)* 43...Nd5 44.Ne5±]

42.Qb2! (Δ ♘g4). This move is strong.

[But stronger is 42.Qe4! (Δ ♘g4-e5) , and Black loses the pawn. The queen on e4 is incredibly strong, White is threatening all Black's weaknesses - e6, h6, g6. Qc7 *(*or *42...Qf8 43.Ng4+-)* 43.Ng4! Kg7 *(*If *43...Ne7* then *44.Re1!+-)* 44.Qxe6 and White is winning. h5 45.Qe5+ Qxe5 46.Nxe5+-]

42...Qf8 The only way to save the material. **43.Ng4 Qg7 44.Qc2!** This is necessary to attack all the weaknesses; the queen comes to the right square.

[Worse is 44.Ne5+ because after this, it's more difficult to attack the e6-pawn. Kg8 45.Qc2 Kh7±]

44...Kg8 45.Qe4! The best position for the queen.

[Worse is 45.Qc6?! because of Qe7! 46.Re1 *(46.Nxh6+?!* is not the win of the pawn *Kh7 47.Ng4 Nxb4!±)* 46...Rd6± and Black continues the resistance.]

45...Rd6□

[Of course not 45...Re8? 46.Rxd5!+-]

46.Ne5 Kh7□

[If 46...g5 then 47.Nc4!+- Rc6 48.Rxd5]

Now, when Black's pieces are forced to defend the kingside, White can prepare the invasion on the queenside. Black can't avoid it. **47.Rc1! Qf6 48.Rc8 Qf5 49.Qe1!** The queen is going to the long diagonal, but what is very important, is that White controls all the squares, and doesn't give Black any counterplay.

[There are a lot of ways to spoil everything. For example: 49.Qd4? White wants to attack immediately, but after Qb1+ 50.Kg2 g5! White would have to be accurate to equalise. The most simple is 51.fxg5 hxg5 52.Rc7+ Kg8 53.Rc8+ Kh7 54.Rc7+=]

[Also 49.Qxf5?! would be an inaccuracy: exf5 50.Ra8 White still

has a serious advantage, but Black has real chances to save the game. g5! 51.Rxa7+ Kg8 52.fxg5 hxg5±]

49...b5 Actually, the position is almost lost for Black, now it's just a question of practical chances.

[Black can provoke the crisis immediately 49...g5 50.Qa1! (Δ ♖h8).

A) If 50...gxf4 then 51.Nc4+- and White wins fxg3 52.Rh8+ Kg6 53.Rg8+ Kh5 54.hxg3+-;

B) It's late to defend 50...Qf6 51.Ra8! gxf4 *(or 51...Ne3 52.Qc3!+- Rd1+ 53.Kf2)* 52.Rxa7+ Kg8 and now 53.Rf7! Qg5 54.Qb1 Nf6 55.Qc2! Rd8 56.Nf3+-;

C) 50...Qe4 51.Ng4! looking to h8. e5□ 52.Qxe5 Qxe5 53.fxe5 Re6 54.Rd8 the endgame is winning for White. h5 *(If 54...Nc3 then 55.Rd6+-)* 55.Rxd5 hxg4 56.Kf2! Rh6 57.Kg2 Re6 58.h3+-]

50.Qa1

[50.Qc1 also wins.]

50...g5?! This loses immediately, but the position is bad anyway.

[If 50...Qf6 then White attacks the queenside 51.Qf1! Qf5 *(or 51...a6 52.Qf2+-)* 52.Qxb5 Qb1+ 53.Qf1 Qb2 54.Qf2+- and White wins, because if Black takes the pawn, then the kingside falls Qxa3 55.Qc2! and checks don't help Qa1+ 56.Kf2 Qd4+ 57.Ke2! Qe3+ 58.Kf1+-]

[Probably, the best chance is 50...Ra6!? now the rook is far away from possible attacks of the knight, and White still must to find good moves to win the game. 51.Rd8! Qc2 52.Nxg6! Nc3 53.Ne5+- The position is sharp, and full of interesting variations, but White is winning in all lines, of course during the game there's still a lot of work to do.]

51.Nc4! The most accurate.

[Also wins 51.Rh8+ Kxh8 *(or 51...Kg7 52.Nc4++-)* 52.Nf7+ Kh7 53.Qh8+ Kg6 54.Ne5+ Qxe5 *(If 54...Kh5 then 55.Qe8++-)* 55.Qxe5+-]

51...bxc4 52.Qh8+ Kg6 53.Rg8+ Kh5 54.Rxg5+!+- This is the point, now it's all over. **54...Qxg5 55.fxg5 c3 56.Qxh6+ Kg4 57.g6 e5+- 58.g7** Black resigned.

[Ramirez Alvarez,Alejandro]

Slow 100min+30sec **1.d4 Nf6 2.c4 g6 3.Nc3 d5 4.e3 Bg7 5.Qb3** This is an unusual way of handling the Grünfeld Defence, which is almost Svidler's only defence against 1. d4. However it is not without poison, as Ivanchuk shows.

[There have been some developments in the following line 5.cxd5 Nxd5 6.Nxd5 Qxd5 7.Ne2 which I've already covered, on more than one occasion, in recent months: c6 8.Nc3 Qd6 9.Be2 0-0 10.0-0 *(interesting is 10.f4!?* to hold back ...e5, then *Nd7 11.0-0 Rd8 12.Qc2 Nf6 13.Rd1 Bf5 14.e4 Ng4 15.Qd2 Qc7 16.e5* as in Almeida Quintana, O-Esserman, M Montcada i Reixac 2011, and now *h5!* keeps matters balanced*)* 10...Nd7 11.Qc2 e5 12.dxe5 Qxe5 13.e4 Qe7 *(*varying from *13...Nf6 14.Be3 Ng4 15.Bxg4 Bxg4 16.h3 Bd7 17.Rad1 Qe7 18.Bd4* Kramnik, V-Svidler, P Amber rapid 2010, which was in any case close to equal*)* 14.Be3 Re8 15.Rad1 Ne5 16.f3 Be6 17.Kh1 Nc4 18.Bc1 Rad8 19.Rxd8 Rxd8 20.Rd1 Rxd1+ 1/2-1/2 Markus, R-Sedlak, N Decs 2011. So Black has generally been getting reasonable positions out of the opening in this line.]

5...e6

[5...c6]

[5...dxc4 are two other ways of dealing with the pressure on d5, but they lead to a completely different type of game.]

6.Qa3 You could say this is the "point" of White's setup. Black can't castle for the time being, so he has to solve that problem. **6...a5** Svidler chooses a rather aggressive way of solving the issue. The idea of a5 is to defend b4, allowing hiw b8 ♘ to anchor himself there.

[Glenn Flear: 'The most common move is' 6...Nc6 Glenn Flear: 'e.g.' 7.Nf3 Ne7 is Cheparinov's way of handling the position. *(7...Bd7 8.cxd5 exd5 9.Bd2 Ne7 10.Qb3 Rb8 11.Ne5 0-0 12.Nxd7 Qxd7 13.Bd3*

c6 (so we have a Carlsbad structure where White has the bishop pair. However, in return Black has good development.) *14.Qa4 Ra8 15.Qc2 Nc8! 16.0-0 Nd6* (often an excellent square for a knight in such positions) *17.f3 Nfe8 18.Be1 Nc7 19.Bg3 Ne6 20.Qa4 Rfd8 21.Rad1 Qe7=* Dreev, A-Dominguez Perez, L Melilla 2011.*;* here *7...Qe7!?* is playable, but is slightly uncomfortable for Black, whereas 7...a5 transposes to the main game *)*]

7.Nf3 Nc6 8.Bd2 Nb4 9.Qa4+!? This interesting check is Ivanchuk's improvement on the position. The only other two logical moves had been tried before.

[9.Rc1 is quite logical, and had been tried by Ben Finegold against Antal in the Chicago Open a few years ago. However it does not lead to any type of advantage. 0-0 10.cxd5 exd5 11.Nb5 Nc6 12.Be2 Ne4 13.0-0 Finegold, B-Antal, Ge Chicago 2009, Black has a wide choice of ideas. I quite like Bg4 *(13...f5!?* was played in the game*)* 14.Rfd1 Ng5 with good play.]

[9.Qb3 was Rombaldoni's choice, but it's just not as accurate. Ne4!? *(*maybe *9...0-0 10.a3 dxc4 11.Bxc4 Nbd5;* whereas the most dynamic option is *9...c5!? 10.a3 Nc6 11.cxd5 exd5 12.dxc5 0-0 13.Be2 Ne4* as in Suba, M-Shirov, A Cala Galdana 2001 *)* 10.a3 Nxd2 11.Nxd2 dxc4 12.Bxc4 Na6 13.0-0 0-0 turned out to be a little passive for Black in Rombaldoni, O-Mekhitarian, K Khanty Mansiysk 2010.]

9...Bd7 There is no other way to defend from the check.

[9...Qd7 10.Nb5±]

[9...c6 10.a3±]

10.Qb3 The bishop find itself slightly misplaced on d7. The main problem is that it is impeding the black ♕ from guarding the d5 pawn. This means that a3 might be a threat, or would at least force Black into giving up the centre with dxc4. **10...dxc4?** I think this is the beginning of Black's long term strategic problems. Svidler just had to be more active.

[10...c5!? is a very Grünfeld-like move. Not being an expert in this defence I don't want to say that it goes with the spirit of the setup, but it does look logical.

A) 11.dxc5 Rc8 12.a3 *(12.cxd5 Rxc5* and it seems unlikely that White will be able to hold to his material. *)* 12...Na6!∓ is the other point.;

B) 11.a3 a4∞ is the point.]

11.Bxc4 Bc6 12.a3

[Similar in some ways is the following: 12.Be2 0-0 13.0-0 Nbd5 14.Ne5 Nxc3 15.bxc3 Ne4 16.Nxc6 bxc6 17.Rad1 0.5-0.5 Farago, I-Ftacnik, L Hamburg 2004, although White could perhaps have played for more with 17. Be1 followed by f2-f3. *(17.Be1!)*]

12...Nbd5

[12...Bxf3 13.gxf3 Nbd5 14.Qxb7± is 0 compensation.]

13.Ne5 0-0 14.Nxc6 bxc6 15.Qc2± White has the pair of bishops and a healthier pawn structure. He just needs to castle to complete development, and has no glaring weaknesses. If this is not an opening success I do not know what is. **15...Qe7 16.0-0 c5** Black manages to exchange one of the doubled pawns, but his structural weaknesses remain.

17.Ne2! Very beautiful, precise play. Ivanchuk doesn't want to saddle himself with a target on d4. **17...cxd4 18.Nxd4 c5 19.Nb5 Rfc8 20.Rfd1**

[20.Rad1 was a tad more accurate, the idea is to answer Ng4 with 21.Be2 since now Qh4 22.h3 is possible, which it isn't in the game.]

20...Ng4 An attempt for activity, as Black lacks a clear plan. **21.h3 Ne5 22.Be2 c4 23.Rac1 h5** This is an interesting point to look at the position. White has the pair of bishops and has pressure on the c4 and a5 pawns. On the other hand, Black has a couple of well placed ♘s near the centre and can potentially put a lot of pressure on b2. It seems logical then that White must force Black into slowly but surely retreating. The best way to do this is by pushing out the centralised knights. Ivanchuk tries to manoeuvre around before committing to e4, but I think this gives Black too much freedom. **24.Nc3**

[24.e4 Rab8 25.Nd4 Nf6 26.Bc3!± White here is solidly maintaining his position while keeping his options open. Black is slightly worse but still has a lot of play. *(26.Bxa5 Qb7 27.Bb4 Qxe4=* and Black has good play. *)*]

24...Nb6 25.Ne4 Nd5 26.Nc3 Nb6 27.Ne4 Nd5 28.Be1 Ivanchuk has shied away from committing to e4 at some point. This has let Black have a couple of active pieces, but White's position remains quite pleasant. **28...Rab8** With the obvious threat of ♖xb2. Ivanchuk protects himself in the most obvious way possible, but things start getting murky. **29.Kh1?!**

[29.Nc3 Nb6 30.f4±]

29...Nd7

[Glenn Flear: 'Judging the following isn't easy, but I think that Svidler should have gone forward:' 29...Ng4! was surprisingly interesting. 30.Rb1 *(30.hxg4? Rxb2* and White loses.*)* 30...Ngxe3 *(30...Be5!? 31.Nc3 Bxc3! 32.bxc3 Ne5=* and Black is just fine. His ♘s are at least as powerful as those caged in ♗s.*)* 31.fxe3 Nxe3 32.Qc1 Nxd1 33.Bxd1 f5 34.Nc3 e5 Glenn Flear: 'with an asymmetric position where Black's two good pawns and rook should give enough compensation for two pieces.' Of course, it is always hard to evaluate such a position. White is temporarily passive, and the central pawns look quite mighty, but it is not clear if that is enough to control the minor pieces. All results would be possible from this position.]

30.Rb1 Nc5? This strange move seems to spoil the nice activity Svidler had achieved. The pawn can be taken without consequence, which gives Ivanchuk a strong advantage.

[Glenn Flear: 'Returning with' 30...Ne5 Glenn Flear: '!' Glenn Flear: 'may be better:' 31.Bxa5 Glenn Flear: '!?' Nd3! Not the easiest move to find, but it was necessary. It is the only way Black can regain the pawns.

A) 32.b3 Nxf2+! 33.Nxf2 Nxe3 34.Qe4 Nxd1 35.Bxd1 *(35.Rxd1 Qc5 36.Be1 cxb3-+* Black will swiftly gain material for his advanced passed pawn.*)* 35...Qxa3∓ and Black is definitely better.;

B) 32.Bxd3□ cxd3 33.Qxd3 Bxb2 Glenn Flear: 'as here the extra pawn will be tough to exploit with Black being so active.' 34.a4 Qa7

and Black regains all his pawns, with obvious equality.]

[Instead 30...f5 may just prove self-loosening after the simple retreat 31.Nc3]

31.Bxc4 Nb6 32.Bb5 Nd5 33.a4 White has an extra pawn and although Black is still active, it's hard to believe this is full compensation for the pawn. White's plan is now quite simple, he will untangle and win with his extra pawn. Black doesn't have any targets so as to be able to prevent this. **33...Na6 34.Qe2 Nab4 35.Rbc1 Rc7 36.Nc3**

[36.Rxc7 Qxc7 37.Nc3 was a better way of doing things I think, as Black doesn't get as much pressure on the c-file.]

36...Rbc8 37.Nxd5 exd5 38.Rxc7 Rxc7 The position has simplified a little, and it doesn't help Black at all. His best hope now is that the blockade on the queenside holds without any additional damage. **39.b3 Bc3**

[39...Rc2?? loses immediately to 40.Bxb4]

40.Rc1 Qf6 41.Qf3 Qe5 42.Qg3! A beautiful concept. White sacrifices his structure to simplify the position, thus depriving Black of all his activity. Now the position becomes easier to handle. **42...Qxg3 43.fxg3 Be5 44.Rxc7 Bxc7 45.Kg1 Nc2 46.Bd2 Bb6**

[46...Bxg3 is worse due to 47.Bxa5 Nxe3 48.Bb6 and the a-pawn quickly decides.]

47.Kf2 The pair of bishops and the activity of the king are too much for the black forces. **47...d4 48.e4**

[White cannot approach with his king following 48.exd4 Nxd4 49.Be3 Bc5]

48...d3+ 49.Kf1 Ne3+

[49...Nb4 50.Bxb4 axb4 51.Bxd3+- should be quite hopeless.]

50.Ke1

[Naturally 50.Bxe3? Bxe3 51.Bxd3 Bd2 would suit Black as the opposite-bishop endgame looks drawn to me.]

50...Nxg2+ 51.Kd1 h4

[51...Ne3+ 52.Kc1 Nf1 53.Bf4 Bf2 54.Bxd3 Bxg3 55.Bxg3 Nxg3 56.b4 and Black's forces are way too far away from the a-pawn.]

52.gxh4 Nxh4 53.b4 axb4 54.Bxb4 Nf3 55.a5 Bd4 56.Be7 Ivanchuk chooses to aid his pawn as quickly as possible, though ♗xd3 should also suffice. **56...f5 57.exf5 gxf5 58.Bd8 Kf7 59.Bb6 Ke6 60.Bxd4 Nxd4 61.Bxd3** ♘s are particularly bad at catching rook pawns because they end up far away from the rest of the board. Especially if the rest of the board is another rook pawn. A very interesting opening by Ivanchuk that paid great dividends, and although Svidler played a strong game and maybe even had chances to equalise, one slip was enough for him to lose. Ivanchuk's technique after winning the pawn in the middlegame was absolutely flawless. **61...Ke5 62.a6 Nc6 63.Ke1**

[63.Bb5 Na7 64.Bd7 is of course also good]

63...Kf4 64.Kf2 Kg5 65.Kg3 f4+ 66.Kf3 Kh4 67.Bf1 Kg5 68.Ke4 Na7 69.Kd5 Nc8 70.Kc6 Kf5 71.Kc7 Na7 72.Kb7 1-0 (72) Ivanchuk,V (2775)-Svidler,P (2755) Moscow 2011 CBM 146 [Ramirez Alvarez,Alejandro]

[A new move for this site, but on the current evidence this Marshall-like gambit is fine for Black. More usual has been 9...d6 and now 10.a3 is topical - see Wei Ming's coverage from last month.]

10.exd5 Nxd5 11.Nxe5 Acceptance must be critical, but the fact that White has tried a couple of alternatives shows that 9...d5 is actually quite a good move:

[a) 11.c3!? Qd7 *(11...f6 12.d4* is probably a little better for White*)* 12.Nxe5 Nxe5 13.Rxe5 accepts the pawn after all, but with ...Nd4 prevented en route. No lesser game than Topalov-Leko, Linares 2008, continued Rad8 14.Qg4 f5 15.Qg3 Bf6 16.Re1 and now, as well as Leko's Kh8 , *(*the simple *16...Rfe8!? 17.Rxe8+ Rxe8* deserves attention. I find it hard to believe that Black hasn't sufficient compensation after *18.Bd2 c5* with plenty of activity for the pawn. *)*]

[b) 11.Nbd2 Nf4!? *(* the most forcing, although the solid *11...f6* may also be fine *)* 12.Ne4 Na5 13.Bxf4 exf4 14.d4 Qd7 15.c3 Nxb3 16.axb3 Rfe8 17.Qd3 f5! 18.Ned2 Bf6 made it hard for either side to make progress and was soon agreed drawn in Adams-Aronian, Yerevan (rapid) 2008.]

11...Nd4!

[Black's invariable choice because 11...Nxe5?! 12.Rxe5 Bf6 13.Re1 c5 14.Nd2 and 15 Ne4 favours White.]

12.Nd2

[A rare move, but not it seems an especially promising one. White has more often challenged the d5-knight with 12.Nc3 , although after Nxb3 13.axb3 Nb4!? 14.Bd2 *(14.d4!?* may be a more critical try*)* 14...f6 15.Ng4 f5! 16.Ne5 Bd6 Black had plenty of activity for the pawn in Timofeev-I.Sokolov, Sarajevo 2007.]

[Recently 12.Bd2!? has received some tests, with the idea of dissuading ...Nb4 for the time being. Jakovenko-Aronian, Khanty-Mansiysk 2007, continued c5 *(12...Qd6!?* may improve *13.Nc3 Nxb3 14.axb3 Nb4 15.Bf4 Rae8 16.Ne4 Qd5* certainly seemed OK for Black with his f-pawn set to advance in Parligras-Ivanisevic, European Championship, Plovdiv 2008*)* 13.Nc3 Nxb3 14.axb3 Nb4 15.Rc1 (a key point with c2 over-protected White will be able to retreat his knight to f3) f6 16.Nf3 Qc7 17.Ne4 Rfe8 18.Bxb4 cxb4 19.c4 bxc3 20.bxc3 and now f5!? 21.Ng3 *(*or *21.Neg5?! Bf6 22.d4 Qd6* , sidelining the g5-knight*)* 21...g6 would have kept matters quite unclear Black's bishop-pair and potential outside passed pawn compensate for the missing pawn.]

12...Re8 13.Ndf3

[White's set-up appears a little passive in the game, but neither would 13.c3 Nxb3 14.Nxb3 c5 have left him too well coordinated Black should be OK here too.]

13...Nxb3 14.axb3 f6 A standard device. Black drives the knight back to a slightly sub-optimal square and can now set about seizing some useful space.

15.Ng4 Qd7 16.Bd2 c5! 17.Qe2

[Ivanchuk keeps things solid. Instead the active 17.c4?! Nc7 18.Bf4 Ne6 19.Bg3 Rad8 would only have left White in danger of being worse due to his weaknesses down the d-file.]

17...h5 18.Ngh2 Bd6 19.Qf1

White's knights lack prospects, but they do keep Black's pieces at bay on the kingside. With exchanges down the e-file imminent, a draw seems like a very sensible decision.

23...Nd6 24.Bg3 h5!? 25.Qb2 Bf6 26.h3 Re7 27.Qa3

[It's wrong to simplify on e5 e. g. 27.dxe5 Bxe5 28.Bxe5 Rxe5 as despite ng the superior pawn structure White's knight is short of squares. Then after 29.Nb7 Nf5 Black keeps his knight in order to create threats on the kingside.]

27...Nf5 28.d5! A key moment. Jobava forces the pace to isolate and win the c4-pawn. However he now has the problem of the stability of his knight on c5 which becomes pinned. White thus loses the harmony of his pieces and has to be very careful as play becomes tricky...

28...Qd6 29.Bh2 Ree8 Freeing the e7-square for his bishop. **30.e4 Ng7 31.Rd4!**

[After 31.Rb5?! Svidler would have probably gone for c6! 32.Rb6 Rac8 when Black's pins are more dangerous than White's!]

31...Rab8 32.Ra1 Defending the queen and thus 'potentially' freeing the knight.

32...Be7 33.Rxc4 c6 34.Qa2?!

[After the superior 34.Rd1! Ne6 White can unpin (i.e. both!) with 35.Bxe5! Qxe5 36.dxe6 with advantage.]

[36.Rxd5?? Qb1+]

36...Qb7 37.Bxe5 dxc4 38.Bxb8 Rxb8

[Another annoying pin 38...Rd8 can be defended against by 39.Qd2 When Black would capture on b8 anyway.]

39.Nxb8 Qxb8 40.Qxc4 Ne6 This reminds me very much of the Timman-Parker game (Game 1). White (having two pawns) would like to think about winning but it's often the quality of pieces that matter, here Black's pieces have the f4-square to operate on and create some kingside mischief to compensate his slight material deficit. So I believe that if both sides had plenty of time then a draw would be the most probable result. **41.Qb5 Qf4 42.Qe8+ Bf8 43.Rd7?** Abandoning the first rank is dangerous.

[Better is 43.Qa8 defending the e4-pawn and hitting a5 e.g. Nc5 44.Rd8 when a repetition looks on the cards. *(44.Qxa5? Nxe4 45.Rf1 Bc5)*]

43...h4 44.Ra7 Ng7! 45.Qd8 Qxe4 46.Qd1

[After 46.Rxa5 Qe1+ 47.Kh2 Ne6 48.Qc8 Qxf2 White's king is in danger.]

46...Qe5 47.Qd2 Nf5 48.Kf1 Kg7 By gradually improving his position and preparing to bring his bishop into play, Svidler shows who's boss now. **49.Qd3 Qf4 50.Qf3 Qc4+ 51.Ke1 Nd4**

[Also winning is 51...Bb4 52.cxb4 Qxb4+ and White soon loses his rook or queen.]

52.Qd1

[52.cxd4 Bb4+ 53.Kd1 Qxd4+ is equally hopeless.]

52...Qxc3+ 53.Kf1 Bc5 54.Rc7 Ne6 55.Rb7 Nf4 56.Kg1 Realizing that coming to the centre was wrong, but it's too late... **56...Bxf2+** White has had enough! 0-1 (56) Jobava,B (2651)-Svidler,P (2742) Dortmund GER 2006 [Glenn Flear] Glenn Flear: 'White has had enough! He holds a slight advantage in this position due to his superior development. **7...Bd7**

[7...a6 is certainly considered the main line.]

8.Ndb5 Kd8 The king does not feel comfortable here, but this seems to be part of Svidler's idea considering how much time he used on the clock. **9.Be3 Nc6** There's only a handful of games in this positions, surprsingly two of three o them from this year. 1.d4 Friedel,J **1...Nf6 2.c4 g6 3.Nc3 d5 4.cxd5 Nxd5 5.e4 Nxc3 6.bxc3 Bg7 7.Nf3 c5 8.Rb1** Karjakin is not one to shun the main lines, even against a Grünfeld specialist such as Svidler. **8...0-0 9.Be2 cxd4 10.cxd4 Qa5+ 11.Bd2 Qxa2 12.0-0 Bg4 13.Be3 Nc6 14.d5 Na5 15.Bg5 b6** This move, which has been played a couple times already by Svidler himself, looks kinda obnoxious. ♗xe7? What ♗xe7? In all seriousness though, gambiting this pawn is not all that unusual in the Grünfeld.

[15...Qa3 is the older and more common move, pretending that ♗xe7 is actually a threat.]

16.Bxe7 Rfe8 17.d6 Nc6 18.Bb5 Nxe7 19.Bxe8 Rxe8 20.dxe7 Qa3 21.h3 Bxf3 22.Qxf3 Qxe7 After a fairly forced sequence of events, this interesting position has been reached. White has snagged an exchange, but it wasn't for free. It not only cost a pawn, but White's most dangerous one (the d-pawn). In addition, the outside connected passers could become dangerous one day. If you want my theoretical opinion, I don't think Black should have serious problems here. **23.Rfe1** This is the first new move. While this move may look fairly simple, it allows Black to reposition his bishop to a more useful square.

[23.Rfd1 Shulman's move stopped the immediate ... ♗d4 but Svidler got his bishop to c5 in another way an easily made a draw. Bf8 24.Rd4 Qe6 25.Qb3 Qxb3 26.Rxb3 Bc5 27.Ra4 a5 28.Kf1 Bb4 29.Rbxb4 axb4 30.Rxb4 Re6 31.Ke2 Kf8 32.Ke3 Rc6 33.f4 1/2-1/2 (33) Shulman,Y (2617)-Svidler,P (2739) Ningbo 2011]

23...Bd4 24.Rbd1 Qe5 25.Qd3 Bc5 26.Qa6 White temporarily stops a5, which would solidify Black's queenside completely. **26...Re7 27.Re2 h5** In such a position it can be difficult to do anything serious with your pieces, so Svidler simply improves his kingside. **28.Rd5 Qe6 29.Rd8+ Kg7 30.Qa1+ Qe5** There was no good way to avoid the queen trade, but Black shouldn't really object to it much, as his queenside will be more dangerous then. The main drawback will be that White can more easily advance his kingside. **31.Qxe5+ Rxe5 32.Kf1 a5 33.Ra8** The rook here is quite effective at halting Black's queenside march. **33...g5** Svidler aims to prevent f4-e5 ideas. **34.f3 h4 35.Rd2 f5 36.exf5**

[36.Rd5 had to be calculated, and after Kf6 *(36...Rxd5?* would not be recommended, as after *37.exd5 Kf6 38.Re8! a4 39.Re6+ Kf7 40.Ke2 a3 41.Kd3* and White is winning, since a2 can be answered easily with ♖e1. The key is that Black's king is stuck out of the action while White's is in ideal position *)* 37.Rxe5 Kxe5 38.exf5 Kxf5 39.Ke2 Kf4 is a draw, since neither side can really make progress. Black's king will stick to the kingside, thus forcing White's king to do the same, and meanwhile the rook on a8 keeps Black's queenside from advancing.]

36...Kf6 37.g4 This move isn't necessary, but it doesn't change much. **37...hxg3 38.Kg2 Kxf5 39.Kxg3 Re1** Neither side can really make progress

here. **40.Rd5+ Re5**
[40...Kf6 would also be a simple draw, as after 41.f4 gxf4+ 42.Kxf4 Rf1+ 43.Kg4 Rg1+ 44.Kh5 Rh1 White has no real way to make progress.]
41.Rxe5+ Kxe5 42.Kg4 Be3 The only danger to Black is if White manages to create a kingside passer and get it far advanced. White's main potential hazard would be if Black's king could support the queenside pawns. Both are pipe dreams. **43.Rd8 b5 44.Rb8 b4 45.Rb5+ Kd4 46.Rxa5** White has snagged a pawn, but the b-pawn is dangerous enough he'll have to sac the rook for the other pawn. **46...b3 47.Rb5 Kc4 48.Rxb3 Kxb3 49.h4 gxh4 50.Kxh4** And thus Svidler ensures at least a tie for first.

Wesley, Saint Louis 2017, and Black was under pressure.]

14.b4N A logical novelty by Karjakin. White's idea is to play on the queenside with ♗b2, c4.

[14.Nf1 is the straightforward continuation, Bd7 15.Ng3 c5 16.Be3 exd4 17.cxd4 c4 18.Qd2↑ Grandelius-E.Hansen, Wijk aan Zee 2017, with the initiative.]

14...Bb7 15.Bb2 Qd7 16.c4 This is the idea of White's setup. Normally it is very rare that White has 5 pawns next to each other on the 4th rank. **16...exd4?!** A dubious move, because Black will have problems on b5.

[16...bxc4 was better, 17.dxe5 Nxe5 18.Nxe5 dxe5 19.Nxc4 Bd4 and Black is also active,]

[or even the cool-blooded 16...Nh5!? is also possible, for example: 17.axb5 *(17.dxe5? Nhf4! 18.exd6 Nxg2! 19.Kxg2 Nf4+-+* with a decisive attack. *)* 17...axb5 18.c5 Nhf4⇄ with a complicated middlegame.]

17.cxb5! The right reply! **17...d3?!** Another inaccuracy. At first sight 17...d3 is a logical intermediate move, because ...♘f4 will come with tempo. On the other hand the light-squared bishop will be strong on the a6-f1 diagonal.

[However 17...axb5 18.Nxd4 bxa4 19.Bxa4 c6 20.Qc2± is also comfortable for White.]

18.Bxd3 Nf4 19.Bf1! This is the right square for the bishop. White sacrifices the e4-pawn, because on the queenside he will be stronger. **19...Nxe4**

[19...axb5 20.Bxb5± is also better for White.]

20.Nxe4 Bxe4 21.bxa6 Qf5 Threatening ... ♘xh3. **22.Ra3!** A great move, White activates his ♖ from the 3rd rank and protects the f3-knight. **22...c5 23.Nh4** A strong intermediate move! Now it is not easy to choose for Black where he will put his queen, moreover ♖g3 can be unpleasant at an appropriate moment. **23...Qe6**

[23...Qg5? loses, as 24.Rg3 Qxh4 25.Rxg7+ Kf8 26.Qxd6++- and wins.]

24.b5+- White's queenside pawns are very dangerous. a5, b5 is his main threat. **24...c4 25.Bd4** The best practical move. White frustrates all counterchances; now he neutralises the a7-bishop.

[25.a5 Bc5]

25...Bxd4 26.Qxd4 d5 27.Rg3

[The careless 27.a5? could have been met by Qe7 double attack, 28.Rg3 Ne6⇄ and White loses the h4-knight, the position is not easy.]

19...dxc3 This is the simplest solution, but it allows White to retain some symbolic advantage.

23.Rb1 Qxb7 24.Bd3 Qa8 25.Rxb8 Rxb8 26.Bb2 ±/= White has the bishop pair, more space and the better structure. But in view of the reduced number of pawns, his chances to prove anything concrete are very slim. **26...Qa2 27.Re2 h6 28.Qc1 Qb3 29.Bc4 Qb7 30.Qd1**

[Since White intended to play e4-e5 it would have made sense to keep the

30...Re8 31.Bxf6 Betting on an illusory attack.

[31.e5 dxe5 32.Nxe5 Nxe5 33.Bxe5± /= is not too promising either, but White would at least keep some symbolic pressure.]

31...Nxf6 32.e5 dxe5 33.Nxe5 Re7 34.Qd4 Nd7 Those thinking the game would not last for too long were right, but they surely failed to guess the result as a draw looks inevitable already.

35.Nxf7 This does not spoil anything yet, as after general exchanges on f7 the reduced material would not offer Black any winning chances. In fact, the f7/f2 square theme will be recurrent in this match.

[But a more restrictive move order was 35.Rb2 Qc7 36.Nxf7 Rxf7 when Karjakin's manoeuvre 37.Rb5 is entirely playable, but not really effective after, say, Bc5=]

Occupying the square on offer.

37.Rb5?? Bringing the last reserves into the attack is not too threatening, as ♖f5 can always be met with ...♘f6.

[Karjakin's blunder was probably intended as an improvement over 37.Rb3 which allows (among many other playable moves) Ne5!?=]

37...Kh8! As simple as that. The white rook is hanging, meaning Black keeps his extra piece. **38.Rd5?!** Shortening the agony. **38...Nb6** Confronted with new material losses, Karjakin resigned. With hindsight, Karjakin's blunder can be regarded as a non-intentional psychological gambit. Had the game ended in a draw, Svidler might have kept his composure and his minimal advantage on the score table, but facing the perspective to win easier than expected he took a few highly uninspired decisions.

1.Nf3 Sagar,Shah Sagar,Shah Sagar Shah Sagar,Shah: 'Shah, Sagar' Sergey usually begins with 1.e4 but every now and then you see him opening with his king's knight. So it didn't come as such a huge surprise for Svidler. **1...d5 2.d4 Nf6 3.c4 c6** Svidler is known all over the chess world for his Grünfeld. Draws against Karjakin and Nakamura and a win against Aronian. '' **4.Nc3 dxc4 5.a4 e6!?** This is considered a tad passive as Black transposes the game into Queen Gambit Accepted territory. Especially because the move c5 will come with a loss of of tempo (c7-c6-c5). But Black would like to say that the way White has made use of his extra tempo is not particularly the best by playing a2-a4.

[5...Bf5 is certainly the main line when the theory runs into pages.]

6.e3

[6.e4 Bb4 7.e5 Nd5 8.Bd2 b5 9.axb5 Bxc3 10.bxc3 cxb5 11.Ng5 is the sharp tactical line which Svidler looked at great depth before the game.]

I prepare all the lines against him and he comes up with a move that I haven't looked at in the morning prior to the game!" Although this move might not be as popular as 9. exd4 it is not without venom. Basically if Black would take on d4 then after exd4 White gets a nice initiative after exd4 threatening the d5 break. [9.exd4 is the main line.]

9...Bd7 Peter made this move quickly. Even though he hadn't revised this line before the game, he remembered that ♗d7 was the main move. That was where his theoretical knowledge ended, but it was important for him to bluff to his opponent that he was well prepared. You can see how over the board psychology plays an important role in the games of these top players.

[9...Nxd4 10.exd4 If Black was able to get in ♗d7-c6 here he would be completely fine. But that is a long way off and White has shown that he is better in this line. Be7 11.d5! exd5 12.Nxd5 Nxd5 13.Bxd5 0-0 14.Be3± and this symmetrical structured position is simply torture for Black. There is simply no easy way to neutralise White's forces.]

10.Nf3!? A nice piece of prophylactic thinking. Black wanted to take on d4 and follow it up with ♗c6, so White simply retreats his knight. **10...a6** Although this wastes time it secures the excellent c7-square for the black queen. **11.e4**

[11.b3 Bb4 12.Bb2 0-0 and Black has no real problems.]

11...Qc7 ♘g4 followed by ♘e5 is one of the common ideas in this position, so Karjakin prevents it with his next move. **12.h3 Bd6 13.Qe2 0-0 14.Bd3**

[14.Bg5 is another option for White but after Ne5 15.Bxf6 gxf6 16.Bb3 Rfd8∓ followed by ♖ac8, the doubled pawns on the kingside don't really affect Black whereas the bishop pair might become an extrmely potent force.]

14...Ne5 15.Nxe5 Bxe5 Black's next idea is to put his bishop on c6. Overall his position is quite harmonious. **16.f4 Bd4+**

[16...Bxc3 17.bxc3 Qxc3 is liked by the engines but Svidler didn't even consider this move for a second. After 18.Bb2⩲ White has bucket loads of compensation for the pawn in the form of an extremely strong dark-squared

[17.Kh1 e5=]

17...Bxe3+ 18.Qxe3 This might be a good positional exercise for anyone who might want to learn about good bishops and bad bishops and prophylactic thinking. Currently the bishop on d3 is not so great. It is desperate for the e-pawn to move ahead and open up the b1-h7 diagonal. However, Svidler will have none of that. He just shuts off everything with this next fine move. 19.Rac1

[19.fxe5 Qxe5∓ The e-pawn is isolated and the bishop is coming next to c6, this is quite a depressing and one-sided position in Black's favour.]

19...exf4 20.Qxf4 Qxf4 Although Black had an option to stay in the middlegame with ♕c5+, once Svidler saw that he could transpose the game into a slightly favourable endgame he didn't hesitate.

[20...Qc5+ was an option, but once Svidler saw that he could go into a slightly better endgame with nothing to worry about, he immediately exchanged the queens.]

21.Rxf4 Be6 22.Kf2 This thematic move, which could have been a text-book example of activating your king in the late middlegame/ early endgame, is double edged. The king can be well placed on e3 or it may become a target for some small tactical tricks. **22...Rac8 23.Ke3 Nd7** Svidler's play is natural and there might not be such a great point in going into the details of whether ♖fd8 was more accurate before ♘d7 or ♖fe8 before the knight move. As things stand Black has the slightly better game but Sergey has things under control.

[23...Rfd8 24.Ne2! exchanging a pair of rooks eases White's defensive task.]

[23...Rfe8 tries to take advantage of the white king. 24.Be2 Nd7 25.Rd1 Ne5 26.Rff1 Rc6∓ And Black definitely has pressure.]

24.Rff1 Rfe8 25.Be2 Nb6?!

This idea of ♘c4+ exchanges a pair of minor pieces and reduces White's difficulties.

[25...Rc6 Followed by doubling of the rooks on the c-file, and ... ♘c5, puts more pressure on White. 26.Rfd1 Nc5 27.Bf3 Nb3 28.Rc2 Na5↑]

26.Rcd1 Nc4+ 27.Bxc4 Rxc4 28.Rf2= Now it is just equal. **28...Kf8 29.Rd4 Rxd4 30.Kxd4 Rc8** After a subsequent ♘d5 the position will peter out and the players agreed to a draw. It can be said that the game was a success for Svidler as with the black pieces he was able to put substantial pressure on his compatriot.

It is a wrong decision because White gets a very strong centre. However nowadays there are chess programs (Houdini, Rybka, Zappa ...) that can justify anything by concrete calculation. **10.Bc2 Nc6 11.h3** I wouldn't recommend 11. ♕e2. What can happen after this move you can see in the game Pelletier,Y-Mamedyarov,S which is very well annotated by Boris Avrukh.

[11.Qe2?! Bg4!N A very logical and strong novelty. *(* I found only one example, where this position had occurred. The game continued: *11...h6?! 12.Rd1 Kh7?! 13.h3 f5 14.e4±* 1-0 Misojcic, M-Kovacevic,P/ Belgrade 1990/EXT 1997 (42) *)*

But Peter was able to show a very thematic idea in this position. What would you play as Black? **10...a6!** There are many other possible moves but I like this one the most and the computer also approves it. One of the reasons why I simply love this move is because it is quite counter-intuitive. White has the doubled pawns on c3-c4 and Black is preparing to dissolve them with the move b7-b5! **11.0-0! b5!** Why is the move b5 so strong? First of all we are threatening to take on c4. If White decides to take on b5 then it opens the a-file and Black can put some good amount of pressure on the a2 pawn with the bishop coming on a6. All in all a6 followed by b5 should become a part of your positional arsenal in such structures. **12.d4!?** Khairullin realises that he must do something active before he gets into a positionally worse middlegame. With powerful moves he is just about able to maintain the balance.

Khalifman: The game between the oldest and the youngest participants (age difference-45 years) was highly expected. I don't want to explain once more what the name Kortschnoj means in our city and young sociable Peter who had already proved his chess strength first of all winning 2 Russian Championship titles has also enough fans in St-Petersburg. After 6 rounds both were at 50% - just 1 point behind the leader so both had some expectations. Tournament fortune was, however, completely different. [The more fashionable move is 7...Nc6 (Game Nos. 39-41), but Svidler liked to play in the old manner, often outplaying his opponents in the resulting complicated positions, even though they are somewhat inferior for Black. 'It is laudable that a young player should aim to get to know the repertoire of the old masters – they had only a fraction of the present-day information, but they understood the game no worse than modern grandmasters!' And again Korchnoi makes a remarkable comment: 'Malicious tongues will say: Svidler was unlucky – his preparations for this meeting were based on a game that I had played 13 years earlier, and he found an improvement there. But I had forgotten that game, and played differently, and even, they will say, more strongly. Well, firstly, it would have been good for Emanuel Lasker to remember his games, and during those 13 years I had played twice as many games as Doctor (of Philosophy) Lasker played in his entire chess career! And secondly, would it not be tedious, especially considering the number of games that I have played, to repeat the same thing several times? Even for the sake of practical success. For me, with my character, it would be rather tedious. And one more point: I do not consider myself to be such a classical player, that it is forbidden to make changes. And I make changes with particular pleasure, improving on my own play. Therefore, with only rare exceptions, I play the opening of every game as if for the first time in my life.'*)* 17.Rae1 -- 18.f4 e4 19.Ncxe4→ Kortschnoj-Mestel/ Beersheva/1984 /]

Candidates Tournament (10) 25.03.2014
[Marin,Mihail]

120min/40+60min/20+(15min+30sec)
1.d4 7 **f5** 7 Glenn Flear: '!?' Glenn Flear: 'A slight surprise from Svidler, but this was actually his second Dutch in the Candidates.' **2.Nf3** 22
[Kramnik's treatment of the fight for the centre strongly reminds me of the following variation: 2.g3 Nf6 3.Bg2 g6 4.Nh3 d6 5.Nc3 Bg7 6.Nf4 c6 7.d5 White sustains his d5-pawn with pieces, not wasting time for the strategically constructive c2-c4. This is how Korchnoi played on three occasions, winning each time! The best known game was Kortschnoj,V (2625)-Gurevich,M (2645) Rotterdam 1990 CBM 018 [Schussler] (1-0, 45)]
2...Nf6 11 **3.e3!?** 38 Glenn Flear: 'Now it's the turn of Kramnik to create a surprise, by deciding to avoid main lines. ' For decades, White has almost invariably met the Dutch Defence with g2-g3, but Black seems to be doing fine in the main lines of the Leningrad system lately. Little wonder that at the top level White is trying stepping aside, relying on his theoretical advantage of the first move in a non-symmetrical position, rather than on long forced variations.
[The Wijk aan Zee winner had a similar approach in the last round of the tournament: 3.Bf4!? Aronian,L (2812)-Van Wely,L (2672) Wijk aan Zee 2014 CBM 159 [Stohl,I] (0-1, 38)]
3...b6 11:02 We can only guess which system Sivdler planned to choose against g2-g3, but in the absence of White's pressure along the long diagonal, a logical answer. This position reminds me of a small incident from my childhood. I was away from home for a few weeks when my father called to tell me he had bought a book on the Dutch Defence. I had no idea at all of the possible plans and ideas, but being caught by sudden enthusiasm I started "analysing" on my own the position after 1.d4 f5. I remember quite clearly that the current position became my main "tabyia" soon. Later, I was disappointed to learn that g2-g3 outrules my setup and switcehd to the 7...c6 Leningrad variation, which is the most critical nowadays, by the way. Anyway, the thing I wanted to highlight is that there must be some logical background to both sides' play, which made my then uninstructed mind take this direction.
[Actually, a more restrictive way of transposing to the ...b7-b6 setup is 3...e6 4.Bd3 b6 Glenn Flear: 'the position after'
A) 5.Nbd2 Bb7 6.0-0
A1) 6...Be7 7.Qe2 Ne4 (otherwise White could try e3-e4) 8.Ne5 0-0 9.f3 Nxd2 10.Bxd2 d6 11.Nc4 and now Black has several ways to a comfortable

4.d5!?N 6:29 Glenn Flear: '!?' Glenn Flear: 'Over the board inspiration? In any case it's a new move (on move 4!). White grabs space, which is an unusual approach when following up to the cautious-looking 3.e3.' An original way of changing the fluent course of the game and a novelty as early as on move 4!!

[A fairly popular system, for those looking to avoid mainstream theory, is one involving 4.Bd3]

4...Bb7 3:03 **5.Bc4** 1:49 This is the moment when White's approach starts ressembling Korchnoi's in the aforementioned games.

[Played before castling, 5.c4 offers Black easy development: e6 6.dxe6 *(6.Nc3 Bb4;* Actually, just few moves after the novelty, play could

have transposed to some lines starting with 3...e6, for instance *6.Bd3 g6 7.Nc3 Bg7* ½-½ (7) Loncar,R (2455)-Lovric,B (2340) Tucepi 1996*)* 6...Bb4+! 7.Bd2 Bxd2+ 8.Qxd2 dxe6 *(8...0-0!? 9.exd7 Ne4 10.Qc2 Nxd7⩱)* 9.Qxd8+ Kxd8 10.Nc3 Nbd7 11.Be2 Ke7 After the exchange of the dark-squared bishops the king finds a safe place in the centre, defending Black's only important weakness, the e6-pawn.]

5...c6 2:35 Glenn Flear: '!' **6.Nc3** 2:47 Glenn Flear: 'The early tension revolves around the d5-square.' **6...cxd5** 20 **7.Nxd5** 1:23 **e6** 39 **8.Nxf6+** 11:50 **Qxf6** 41 **9.0-0** 34 A very unusual position. White has given away his ambitions for a pawn centre, aiming for free piece development. The f5-pawn ensures Black some space advantage, but in the long run may also prove a weakness. **9...Bc5** 8:59 Glenn Flear: 'Black has achieved comfortable development so far, whereas White has to try and decide what to do with his bishop on c1.' The bishop has little scope and will also be exposed here.

[But the attempt for a more natural development to g7 after 9...g6 could be met with 10.Bd2!? When Black practically has to pick up the gauntlet with Qxb2 11.Nd4 Qa3 , hoping that he will survive the opening phase.]

10.Bd2 4:16 Glenn Flear: '!' Glenn Flear: 'A clever idea.' **10...Nc6** 10:19 Not having weakened the long diagonal, Black is not forced to take the pawn.

[Glenn Flear: 'If' 10...Qxb2 Glenn Flear: 'then White has' 11.Nd4 Glenn Flear: '!' Glenn Flear: 'which sets many practical problems:'

11.Bc3 3:30 **Qe7** 35 **12.a3** 7:49 **a5** 1:31 Glenn Flear: 'A normal reply, but later on the weakness of b5 becomes slightly annoying.' **13.Qe2** 9:41 **0-0** 2:54 **14.Rad1** 1:59 Glenn Flear: 'White has been able to catch up in development, but lacks a real pawn presence in the central arena. Hence Svidler's decision to gain space...' **14...d5** 8:16 The central structure is reminiscent (with reversed colours) of the game Svidler-Gelfand from the previous Candidates. Svidler met the Grünfeld with an unusual setup based on d4-e3-f4.

[Black could not refrain from ...d7-d5 for too long: 14...Rac8 15.Bb5 d6 16.Qd2]

15.Bb5 1:30 **Na7** 16 **16.a4** 4:00 Quite a courageous move.

[16.Ba6 looks somewhat safer: Nc6 17.Bxb7 Qxb7 18.Bd4 with similar ideas to what happened in the game.]

[After 16.Bd3 Black could also come back with Nc6 threatening ...e5.]

16...Bd6 13:26 A bit passive.

[Glenn Flear: 'Being a 'two-bishops-phile' I would have considered' 16...Nxb5!? Glenn Flear: 'however after' 17.axb5 Bd6 would have allowed Black fighting for the initiative. Actually, the b7-bishop is far from being passive. It inhibits the pawn break c2-c4 and defends the d5-pawn in view of the desirable central

expansion with ...e6-e5. 18.Ne5 *(18.Be5 Qc7* Glenn Flear: 'and White loses control of e5' *19.Bxd6 Qxd6 20.Rd2 Rac8 21.Rfd1 Rc5)* 18...Rac8 *(18...Rfc8 19.f4* the grip on e5 will be permanent.*)* 19.f4 *(19.Bd4 Qc7)* 19...Rxc3! 17.Ba6! 5:51 **Nc6** 11:14 **18.Bxb7** 6:59 **Qxb7** 11 **19.b3** 56 The absence of the black queen's bishop makes itself felt. White's play is more pleasant already, since the centre is rather more vulnerable than threatening. After the inevitable c2-c4, the black kingside will become vulnerable. **19...Qa6** 3:48 Glenn Flear: 'Slightly cautious.'

[19...Rac8 aiming for play down the c-file looks reasonable.]

20.Qd2 6:49 **Rac8** 6:45 **21.Ng5?!** 5:34 Glenn Flear: 'Now which rook should be used to defend e6?' This knight incursion will eventually turn to White's favour, but in principle it looks more like a waste of time.

A) Black can also play the immediate 9...Bg4 . This move has not been very popular since Kramnik's win over Kasparov in their World Championship match, but it remains playable. White has:

A1) 10.Rc1 and here

A1a) , or 10...0-0 would transpose to the main lines;

A1b) , while Black has also tried 10...Bxf3 11.gxf3 e6 12.d5?! *(*better is *12.Rb1! cxd4 13.cxd4 Qxd2+ 14.Kxd2* with perhaps a slight edge*)* 12...exd5 13.exd5 Nd7 , which was good for him in the well-known game A. Yermolinsky-G.Kasparov, Wijk aan Zee 1999.;

A1c) 10...Nc6;

A2) 10.Rb1 has been universally praised, but Black is probably holding here.

A2a) instead 10...Nd7 11.Bd3 *(*but *11.Rxb7* must be critical*)* 11...0-0 12.Ng5 Nb6! 13.Rb5 Qa3 14.Rb3 Qa5 15.Rb5 Qa3 16.Rb3 Qa5 17.dxc5 Na4 18.0-0 was drawn in A. Giri-F.Nijboer, Eindhoven 2010;

A2b) 10...a6 11.Rxb7! Bxf3 12.gxf3 Nc6 13.Bc4

A2b1) instead 13...cxd4 14.cxd4 Qxd2+ 15.Kxd2 Nxd4 16.f4 Nf5!? should be met with 17.Rc7

, keeping an edge *(rather than 17.exf5?! 0-0-0+!)*;

A2b2) 13...0-0 14.0-0 cxd4 15.cxd4 Bxd4 16.Bd5 and here:

A2b21) 16...Bc3?! 17.Qc1! Nd4 *(* White is also better after *17...Rac8 18.Bb6! Qb4 19.a3 Qb2 20.Qxb2 Bxb2 21.a4* with the bishop-pair*)* 18.Bxd4 Bxd4 19.Rxe7 Ra7 20.Rxa7 Bxa7 21.f4 and White eventually converted his extra pawn in V.Kramnik-G.Kasparov, World Championship (Game 2), London 2000.;

A2b22) 16...Qxd2 leads to a passive but holdable ending: 17.Bxd2 Rfc8 18.Bh6 *(* or *18.Bxc6 Rxc6 19.Rxe7 Rc2)* 18...e6 19.Bxc6 Rxc6 20.Rfb1 Bg7 21.Rb8+ Rc8 and Black drew fairly easily in A. Yermolinsky-Z. Azmaiparashvili, Hyderabad 2002.;

A2b23) 16...--;

A3) 10.--;

B) 9...Nc6 (Kramnik,Vladimir) is covered in Malakhatko-Sutovsky, CVO 33.;

C) 9...0-0 This flexible move has grown in popularity. 1-0 (37) Kramnik,V-Svidler,P 19: Moscow 2009 CD: The Grunfeld [David Vigorito] The alternative 10.Rb1 is not played much nowadays. Compared to Game 18, Black's king has castled so there are no checks on the a4-e8 diagonal and his knight is flexible. Black has:

C1) 10...cxd4 11.cxd4 Qxd2+ 12.Kxd2 Rd8 transposes to 'a' in the note to White's 9th move in Game 14.;

C2) 10...a6 11.Rc1 Bg4 is similar to the game, but here ... Na6 is not possible (not that that is such a good line anyway as we shall see). *(* Black could also play *11...Rd8* , as in Games 20 and 21. The extra move ...a6 does not seem like it would hurt Black. *)*;

C3) 10...b6 is the most combative move and scores well. Black diffuses Rb5 ideas and prepares ...Ba6.

C3a) . For example, 11.Rb5 Qa4 with the idea of ...Ba6;

C3b) , or 11.Bd3 when Black can play Nc6 *(* or the more solid *11...Ba6 12.Bxa6 Nxa6 13.0-0 cxd4 14.cxd4 Qxd2 15.Bxd2 Rfc8 16.Rfc1 e6* as in M.Kobalia-A.Danin, Taganrog 2011*)* 12.Rb5 *(12.e5?! Rd8 13.Rb5 Qa4)* 12...Qa4 13.Rb2 Ba6 .;

[Kramnik,Vladimir: 'while after' 10...cxd4 is actually the most common move historically. Nowadays most prefer to avoid this ending with Black, as after Kramnik,Vladimir: 'Van Delft/Ris' 11.cxd4 Qxd2+ White can play 12.Nxd2 . This is still tenable for Black, but there has not been much action here in recent years. Nc6 Kramnik,Vladimir 13.Nf3 White still has the right to castle.]

[10...Nd7!? is an interesting attempt to get off the beaten track. This has been played quite a bit recently by some very good players, albeit mostly in rapid games. White has:

[This retreat is new for us and looks like an improvement over 11.Ne1 b6 *(11...Nb6* is also possible*)* 12.c4 Bb7 , which should be OK for Black.]

11...Nf8

[And this is the official novelty, 11...h6 12.Bh4 Nf8 13.c4 g5 14.Bg3 Ng6 15.b4 having left White's play looking the more potent (that knight on h2 is a useful defender) in Malaniuk-Duquesnoy, Calvi 2010, although Be6 16.c5 Qd7 17.a4 Nh7 18.b5 f5 19.Bd6 Nf6 would surely appeal to a certain type of aggressive black player.]

12.c4 Qa5

[The queen looks rather misplaced here, but even after 12...h5 13.cxd5 cxd5 14.Nb1! White has an edge, since he can combine pressure against d5 and b7 with pressure down the c-file.]

13.a3 dxc4

[Not what Svidler wanted to do I dare say, but he was presumably concerned by such lines as 13...Be6 14.Qc2 h5 15.b4!? Qxa3? 16.Ra1 Qxb4 17.c5 , trapping the black queen.]

14.Bxf6 Bxf6 15.Bxc4 Bf5?!

[15...Qg5 would at least have swung the queen into play, although after 16.Ng4 Bxg4 *(*or *16...Bg7 17.f4!)* 17.hxg4 and then f2-f4 White would still have been doing fairly well.]

16.g4! Bd7 17.f3!

[Kramnik hasn't lost his touch. Black will now struggle down the f-file, although it must be pointed out that there was absolutely nothing wrong either with 17.Nxe4! Rxe4 18.Qf3 .]

17...Bg5 18.Rc3 exf3 19.Qxf3 Kh8

[19...Be6 was the lesser evil according to the machine, although after 20.Bxe6 Nxe6 21.Qxf7+ Kh8 22.Qxb7 Black would still have done extremely well to have managed to survive]

20.Ne4

[20.Bxf7 and if Re7 21.Ne4 would have been even more clinical, but we shouldn't forget that this was a blitz game.]

20...Rxe4 21.Qxe4 Re8 22.Qf3 f5 23.gxf5 Bxf5 24.Ng4 Nd7 25.Qg3?

[25.h4! was the way to go, and if Bxh4 26.Nh6 .]

25...Qd8! 26.Be2? Bxg4?!

[Remarkably enough, Black would have taken over after 26...h5! , and if 27.Ne5 Nxe5 28.dxe5 h4 29.Qh2 Qd2 ...]

27.Bxg4 Nf6 28.Rd3 Ne4 29.Qf3 h5?

[...whereas now the advance is badly mistimed. As such, Svidler should have retreated, 29...Nf6! , threatening ...h5, and if 30.Qg3 Ne4 31.Qg2 c5 when absolutely anything might have happened.]

30.Bxh5! gxh5 31.Qxh5+ Kg8 32.Qg6+ Kh8 33.Rf7 Ouch.

1.Nf3 Ribli Ribli Ftacnik Donev Das ist Kramniks Lieblingszug. Ribli. **1...Nf6**
2.c4 e6 3.g3 d5 4.d4 Meines Erachtens bietet dieser Zug bessere Chancen auf Eröffnungsvorteil als z.B. 4. ♗g2, worauf Schwarz 4...dxc4 mit besseren Ausgleichschancen antworten kann. **4...Be7 5.Bg2 0-0 6.0-0 dxc4** Der sogenannte klassische Aufbau. Schwarz öffnet das Spiel und nimmt den Bauern. Die Zurückeroberung des Bauern kostet Weiß Zeit, die Schwarz für die Beendigung seiner Entwicklung nutzen möchte. **7.Qc2 a6 8.Qxc4** In letzter Zeit ist die andere Variante mit 8.a4 populär. **8...b5 9.Qc2 Bb7 10.Bf4**
[10.Bg5]
[10.Bd2]
10...Nd5 Mit dem Textzug verteidigt Schwarz seinen ♙c7 und droht gleichzeitig, auf f4 zu nehmen. Der andere Springerzug ist jedoch aussichtsreicher.
[10...Nc6!? 11.Nc3 Nb4 In dieser Variante besitzt Schwarz gute Ausgleichschancen. Sein Plan ist klar: Er will nach Möglichkeit c7-c5 durchsetzen.]
11.Nc3 Nxf4 12.gxf4 Weiß hat einen Doppelbauern auf der f-Linie, beherrscht aber das Feld e5. Das schwarze Läuferpaar ist nicht von großer Bedeutung. Weiß übt zudem starken Druck im Zentrum aus. **12...Nd7 13.Rfd1 Bxf3?!** Ftacnik: Dubious exchange, the defender hopes to exploit opposite colour bishops. His problem are connected with a6-b5 pawn structure and weakness of c6 square. Dieser Zug gefällt mir nicht, weil er die Kontrolle über die weißen Felder aufgibt. Nach diesem Abtausch wird der schwarze Damenflügel spürbar schwach. Donev: Schwarz entscheidet sich für diese theoretische Fortsetzung, weil Weiß im nächsten Zug ♘e5 oder e2-e4 spielen will. Doch nach dem Textzug hat Weiß

klarenVorteil. Wahrscheinlich wird die Variante mit 13... ♗f3 nach dieser Partie in Vergessenheit geraten.

allow early queen exchanges after 5 dxe5 and are considered slightly better for White and therefore they can be thought of as right up Kramnik's alley. The first new move, normal being Nc3, however one wonders what it achieves that outweighs simple development.

11...Nf6 12.Bh6 Nh5 13.N1d2?! Missing Black's strong and highly original idea.

[In order to prevent Svidler's concept, Kurnusov had to play 13.f4! Ng3 14.Qf2 Nxd3 *(14...Nxf1? 15.fxe5)* 15.Qxg3 Nc5 16.N1d2 and White is better.]

Russian Championship (3) 13.12.2010

[Richard Palliser]

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 a6 5.Bd3 Bc5 6.Nb3 Be7 7.Qg4

[Quite a critical test, but by no means the only one, of course, and also this month we'll consider 7.Be3 in Nielsen-Van Wely.]

7...g6 8.Qe2 d6 9.0-0

[Svidler himself had preferred 9.Be3 Nc6 10.Na3!? just a few weeks earlier in Svidler-Vachier Lagrave, Moscow (blitz) 2010, where b5!? *(*rather ambitious *10...Nf6 11.Nc4 Nd7* would be more normal*)* 11.c4 b4 12.Nc2 Nf6 13.0-0 0-0 14.Qd2 *(*perhaps White must begin with *14.f3* when he could even focus on the queenside with a quick a3*)* 14...Ng4! 15.Bf4 Nge5 16.Be2 a5 gave Black decent enough counterplay.]

9...Nc6!?

[Not the most common development of the knight in this variation of the Kan. Indeed, 9...Nd7 is preferred by Hellsten and after the accurate 10.a4 b6 11.Na3! Ngf6 *(*but not *11...Qc7?! 12.Nc4 Bb7 13.a5!* , as we've noted before*)* 12.Bh6 Bb7 White is restricted to at most a small plus.]

10.c4

[I'm not too convinced by the Maroczy approach here, but guess that Kurnosov may already have been on his own. The main drawback is that it doesn't place Black under any immediate pressure. More to the point appears to be 10.a4! and after

Ne5 *(10...b6* makes less sense with the knight on c6 and after *11.Nc3 Nf6 12.Bh6 Bb7 13.f4* White is for choice *)* 11.a5 *(* Motylev's useful waiting move *11.h3!?* may also lead to a plus *)* 11...Nf6 12.Be3 0-0 13.N1d2!? *(13.Nc3* has been more common here, but Bobras wants to have one knight covering d4 and the other with the option of going to c4*)* 13...Nxd3 14.cxd3 e5 (a solid and standard response from Black) 15.Bb6 Qe8 16.d4 Bd7 17.Rfc1 Bb5 18.Qe3 Nd7 19.Rc7 White was slightly better in an encounter played the day before our main game, Bobras-Volokitin, German League 2010.]

10...Ne5 11.h3

[Already we are on fertile ground - who says that the Sicilian is becoming played out? Previously White had preferred the more routine 11.Nc3 , after which Qc7 12.f4 Nxd3 13.Qxd3 Nf6 14.Kh1 *(14.Nd4 Bd7 15.b3* looks like a better set-up*)* 14...Bd7 15.Be3 Rc8 16.Nd2 0-0 17.f5 Ng4! gave Black good counterplay in Zhao Jun-Vachier Lagrave, Shenzhen 2005.]

11...Nf6 12.Bh6 The point behind White's 11th-move novelty becomes clear, but Svidler isn't too troubled by his inability to castle. **12...Nh5!** A good response, angling to take control of the dark squares on the kingside while facilitating ...Bg5. **13.N1d2**

[Routine and probably a little too routine. Instead the critical test must be 13.f4!? when I wonder what Svidler intended. Was it the bold Ng3 *(13...Nxd3 14.Qxd3 b5* is another fairly active approach, again leading to quite an unclear position*)* 14.Qf2 Nxd3 15.Qxg3 Nxb2!? 16.Bg7 Bf6 17.Bxh8 Bxh8 , giving Black the dark squares, quite a solid position and a pawn for the exchange?]

13...Nxd3!?

[I can't see too much wrong with 13...Bg5 14.Bxg5 Qxg5 15.Nf3 Nxf3+ 16.Qxf3 Nf4 , since Black can always follow up with ...e5, but Svidler has a more ambitious idea in mind.]

14.Qxd3 g5! And this is it. Rather than exchange White's bishop, Black wants to trap it on h6! **15.e5!**

[Kurnosov is up to the challenge and responds before ...Rg6 became a serious threat after 15... Rg8. The text isn't obligatory, but after, say, 15.g3 Rg8 16.Qe2 Nf6 17.Qe3 Nd7 18.f4 gxf4 19.Qxf4 Ne5 Black again finds himself slightly for choice.]

15...dxe5 16.Qf3 Nf4 17.Bg7 Rg8 18.Bxe5 Thus White has rescued his bishop, but Svidler has seen further and realised that he can now pretty much force the queens off, after which his kingside activity and bishop-pair should give him whatever advantage is going.

18...Qd3! 19.c5?!

[White doesn't have time for this space-gainer, but in any event I'm not too sure what he should have done. Indeed, Kurnosov's position was already unpleasant as we can see too from 19.Qe3 Qxe3 20.fxe3 Nd3 21.Bc3 g4 22.h4 f5 when Black's bishop will come to the long light-square diagonal, thereby cementing his advantage.]

19...Qxf3 20.Nxf3 f6 21.Bd6

[This doesn't work out too well, but one can understand why Kurnosov was keen to avoid opening the g-file

with 21.Bxf4 gxf4]
[and 21.Bd4? e5 22.Be3 g4 23.hxg4 Bxg4 would have been even worse for White.]
21...e5! Opening up the light-squared bishop and now it's clear that White is going to come under an attack on the kingside. **22.Nfd2 g4 23.h4** White really had to keep lines closed thus, but in any case Black is about to take control of the position. **23...Be6 24.g3?**
[Kurnosov has been completely outplayed, but this only makes matters worse. White had to try and obtain some counterplay with 24.Nd4! when Bd7 25.Nc4 Rc8 would still have favoured Black, but at least this way White could have hoped to stir up some trouble with his knight-pair.]
24...Nd3 25.Rab1 a5
[Increasing the pressure, not that there was much wrong with the simple 25...Bd5 26.Rfd1 Rd8 when it's already pretty hard to find a move for White.]
26.Ne4 Nb4!
[Black's pawns might not be ideally placed after 26...Bd5 27.Nc3 Bxb3 28.axb3 Nxc5 29.Bxc5 Bxc5 , but it's hard to believe that this wouldn't have been pretty good for him. Svidler, though, prefers to retain the initiative and who can blame him for playing for more?]
27.Rfe1 a4!?
[Black most certainly isn't in a hurry as he calmly improves his position, but there was nothing clearly wrong with netting a pawn with 27...Nxa2 .]
28.Nc1 Kf7 29.a3
[Neither would 29.Bxe7 Kxe7 30.b3 have freed White's queenside on account of a3 when he remains badly tied down and sooner or later c5 will drop.]
29...Nc2 30.Rd1 Bf5 The pressure is mounting. **31.Bxe7?**
[Kurnosov's last try was 31.Nc3 Nd4 32.Nd3 , rather unpalatable though this would have been after Rgd8 followed by picking up a pawn for starters on d6.]
31...Bxe4 32.Bd6 Nxa3 Finally the a-pawn falls and without Black losing his killer light-square grip in the process. **33.Ra1 Nc2 34.Ra2** White's position is truly grim and, indeed, one wouldn't really have been able to blame Kurnosov had he given up at this point. He battles on to the time control, but the result was never in doubt: **34...Ke6!** Svidler continues to improve all his pieces in true textbook fashion. **35.Rd2 Nd4 36.Kf1 Nf3**
[36...b6!? would have been more consistent with the activation of Black's king, but the text is hardly bad and soon allows Svidler to pick up the exchange.]
37.Re2 Bd5 38.Ra3 Bc4 39.Nd3 Nd4 40.Rc3 Bxd3 41.Rxd3 Nxe2

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nc3 a6 Diese Variante wird gespielt, wenn Schwarz die lange Rochade von Weiß verhindern will.
[5...Qc7 6.Be3 a6 7.Qd2 Nf6 8.0-0-0 Bb4 9.f3⇄ Das ist heutzutage die Hauptvariante, in der Weiß gute Ergebnisse erzielt.]

9.Re1 Ich finde, dass der Zug 9.♕e2 etwas besser ist, weil der Turm dann nach d1 gehen kann, und Weiß sich mittels b3-♗b2 entwickeln kann.

[9.Qe2 Be7 *(9...Qc7 10.b3 Bb7 11.Bb2 Bd6 12.Kh1 Bf4 13.Rae1 0-0 14.g3±* 0-1 Karjakin,S (2725)-Ivanchuk,V (2748)/Nice 2010/CBM 135 Extra (41)*)* 10.b3 Bb7 11.Bb2 0-0 12.Rad1 Qc7 13.Na4! 9...Be7 Es gibt viele Züge, die Schwarz machen kann, aber im Großen und Ganzen ist der Unterschied zwischen den Varianten sehr klein, nur falls Schwarz etwas Absurdes spielt, kann man einen Unterschied sehen. Sonst kommt man immer wieder zu demselben Stellungstyp.

[9...Bb7 10.Bf4 Be7 11.Qf3 Qa5 12.a3± 1-0 Anand,V (2782)-Morovic Fernandez,I (2573)/Sao Paulo 2004/CBM 103 (15)]

10.e5 Das ist die klassische Spielweise - alle spielen es, niemand bekommt etwas. Weiß sollte versuchen, die Spannung im Zentrum so lange wie möglich zu halten.

10...Nd7 11.Qg4 Das ist die Idee des Zuges 10.e5. **11...Kf8!?** Da die Stellung geschlossen ist und Weiß keine Chance hat, sie effektiv zu öffnen, macht es nichts aus, dass der König im Zentrum bleibt.

[11...g6 ist auch möglich: 12.Bh6 Rb8 13.b3 Bb4 14.Bd2 0-0 15.h4 Be7 16.h5 Rb4 17.Qe2 Rh4 18.hxg6 fxg6⇄ 0-1 Inarkiev,E (2683)-Movsesian,S (2699)/St Petersburg 2012/CB40_2012 (40)]

[11...0-0? Das ist der einzige Zug, wo es sich lohnt 10.e5 gespielt zu haben. 12.Bh6 g6 13.Bxf8+-]

12.b3 c5 13.Na4 Bb7 14.c4 d4 Die letzten Züge sind alle typisch für diese Bauernstruktur. Nun muss Weiß die weißfeldrigen Läufer tauschen und dabei versuchen, die schwarzfeldrigen zu behalten. Dann kann er 50 Züge lang hin und her ziehen und versuchen, Schwarz in eine Falle zu locken. Die Stellung wird dabei die ganze Zeit ausgeglichen bleiben. **15.Nb2 h5** Schwarz will später ...g6 spielen und seinen König nach g7 bringen. **16.Qe2**

[16.Qg3 h4 17.Qg4 h3! Schwarz schwächt den weißen König, was ihm langfristig gewisse Extrachancen bietet. 18.g3 Qc7 19.f4⇄]

16...Qc7 17.Be4 g6 18.Nd3 Auf der einen Seite hat Weiß das Maximum erreicht, aber es ist trotzdem nicht genug, um einen spürbaren Vorteil zu bekommen. Schwarz hat immer wieder die Möglichkeit a5-a4 zu spielen, und wird daher den weißen Springer zurück nach b2 zwingen. **18...Kg7 19.Qf3**

19...Bxe4 20.Rxe4 Qc6 In dieser Stellung ist nichts los - Schwarz bleibt stehen und wartet, was Weiß macht. Weiß seinerseits hat keinen aktiven Plan, er kann nur am Königsflügel etwas versuchen, aber dort sind ja alle schwarzen Figuren. **21.h4 a5 22.Nb2** Weiß sollte Schwarz nicht erlauben, ...a4 zu spielen.

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nc3 a6 6.Nxc6 bxc6 7.Bd3 d5 It's been a while since we considered this solid, yet fairly critical line of the Taimanov. Unsurprisingly both players proceed down the main line. **8.0-0 Nf6 9.Re1 Be7 10.e5 Nd7 11.Qg4 Kf8!?**

[A new move for the site. Clearly Black must avoid 11...0-0? 12.Bh6 and Svidler has no desire to weaken his kingside structure. A similar dilemma awaits Black in the McCutcheon French, but there the king move is somewhat more popular.]

[Here we've previously focussed on 11...g6 , after which an important game this year proceeded 12.b3 (far from obligatory, of course instead *12.Bh6 Rb8* was considered by Tony in Polgar-Anand, Sofia 2005, where White made a useful prophylactic queen move to h3, which seems superior to *13.b3 Bb4 14.Bd2 0-0!? 15.h4 Be7 16.h5 Rb4 17.Qe2 Rh4! 18.hxg6 fxg6* which saw Black taking over the initiative in Inarkiev-Movsesian, St Petersburg (rapid) 2012,; and another important line remains *12.Na4!? Qa5 13.Bh6* - see the Archive for plenty of coverage) 12...Rb8 (we've previously noted that *12...c5 13.Na4* was well

met by *c4!* in Adams-Svidler, Dortmund 2005, and, indeed, the c-pawn advance back on move 12 still looks pretty critical from what I can see *)* 13.Na4 Qc7 14.c4! h5!? *(14...Nxe5 15.Rxe5 Qxe5 16.Bb2* sees White regaining his material with interest, but neither does the text especially convince*)* 15.Qf4 h4 16.cxd5 cxd5 17.Bd2 Bb7 18.Rac1 Qd8 19.h3 and White had taken control in Andreikin-Potkin, Russian Championship, Moscow 2012.]

12.b3 This certainly feels natural and, indeed, I'm not sure what White could have done instead of proceeding with the thematic blockading plan of Na4 and c4. **12...c5 13.Na4 Bb7**

[Sensibly developing, since 13...c4 is no longer so convincing. Indeed, 14.Bf1 h5?! *(14...Bb7* improves, but still *15.Rb1 Bc6 16.Nc3 Rb8 17.Bd2* must be slightly in White's favour with the queenside opening*)* 15.Qd4 cxb3 16.cxb3 Bb7 17.Bd2 was already rather pleasant for White in Rudolf-Haapasalo, Jyvaskyla 2009.]

14.c4 d4! This is the impressive point of Svidler's preparation. One would have thought that the resulting structure might well favour White, but that doesn't appear to be so. **15.Nb2**

[Strictly speaking a novelty, but the plan of Be4 and Nd3 is pretty obvious. Previously, 15.Qg3 h5 16.h3 g6 17.Bf4 Bh4 18.Qh2 Be7 19.Qg3 had led to an early repetition in Benjamin-Zaichik, Seattle 2003. Thus it's Zaichik who should really be receiving all the credit, but as is often the way in these data-laden times, it's only when a really top player starts using an idea that the world sits up and takes notice.]

[Incidentally, here I wonder about 15.Qh5!? , preventing Black's next and intending to continue with Bf4, Nb2, Be4 and Nd3. Perhaps this plan will receive a test if the Zaichik-Svidler idea is repeated, as surely it will be.]

15...h5! A useful gain of space and one which makes it a little easier for Black to house his king on g7. **16.Qe2 Qc7 17.Be4 g6 18.Nd3** Leko completes his mini-plan, but in the meantime Svidler too has been developing harmoniously enough and the question now for White is: what next? **18...Kg7 19.Qf3**

[Trying to force the exchange on his terms and perhaps hoping one day to exploit the slight weaknesses in Black's kingside. Instead 19.Bd2 angles for a b3-b4 break, but after a5 that remains tricky to arrange and meanwhile White must always watch out for a timely ...a4.]

19...Bxe4 20.Rxe4

[20.Qxe4 might have been met by a5 , *(*although *20...Rhc8* followed by ... Qc6 also seems reasonable enough for the second player. *)*]

20...Qc6 21.h4 a5 It's all very easy for Black and now Leko finds himself having to go backwards to keep control of the queenside situation. **22.Nb2 Qc7**

[If Black was desperate to win, perhaps he might have tried 22...f5!? , although after 23.exf6+ Nxf6 24.Re2 *(*but not *24.Rf4? Qd6* when ...e5-e4 is coming*)* 24...Qxf3 25.gxf3 Kf7 26.Bg5 I'd be surprised if White's weaknesses weren't less important and easier to defend than Black's.]

23.Qg3 Qc6 24.Re2

[Declining the immediate repetition with 24.Qf3 Qc7 , but even the text followed by a trade of bishops fails to dent Svidler's solid set-up.]

24...Rhb8 25.Bg5 Bxg5 26.Qxg5 Qc7 27.Rd1 Qd8 Wisely continuing to offer exchanges and remember that as soon as the white knight returns to d3, Black will go ...a4. **28.Qf4 Qe7 29.Re4 Nb6 30.Nd3 Nd7**

[He failed to follow my rule! OK, very wisely for there was a trap: 30...a4? 31.Qf6+! Qxf6 32.exf6+ Kxf6 33.Nxc5 , and if e5 34.f4 , leaving White with some advantage. Instead the two old adversaries, both struggling to improve their forces further, prefer to engage in a repetition.]

[For the time being, White refrains from weakening the f3-square with the more popular 10.g4 . Leko probably wanted to prevent the following plan, introduced by Kasparov in 1988 and employed a couple of times by Morozevich in 2005: Nd7 11.h4 Nde5 when White needs to spend a tempo on the defence of the f3-pawn. However, this might have been unnecessary precaution in this concrete case, since Svidler has a different pet variation.]

[This is an interesting novelty over the game Leko-Kasparov, Linares 2003 which continued with 19...a4 Ü 87/213 and ended in a draw after complicated fight. It seems to be in Svidler's nature to fight against the opponent's advantage of space in such radical way. Compare with the move 30...f5 from the game against Aronian, played in the 5th round of the Morelia half, although this time the advance oif the f-pawn seems to be more to the point. An interesting tactical phase will follow now, leading to mass simplifications and an obvious draw.]

In fact, this exchange has weakened a bit his own King's position, while ×f4 is, for the moment, well defended. (in fact, White is likely to play f2-f4 soon). But the main problem for Black is the passive position of ♘e7, combined with the bad coordination of the other pieces (♜f6) Strukturell gesehen könnte man meinen, dass Schwarz gut steht, da es ihm gelungen ist, seinen vermeintlich "schlechten" Läufer zu tauschen. Aber in Wirklichkeit hat dieser Abtausch seine eigene Königsstellung ein wenig geschwächt, während ×f4 im Moment noch gut gedeckt ist. (Tatsächlich wird Weiß wahrscheinlich bald selber f2-f4 spielen). Aber das Hauptproblem des Schwarzen ist die passive Stellung des ♘e7 sowie seine insgesamt schlecht koordinierten Figuren (♜f6). **17...Qc7 18.Qd2 Raf8 19.Rae1** White already threatens f2-f4 with favourable for him opening of the position. 11...Nxe4 Black has exchanged his b-pawn for a central one. However, he is a little under developed on the queenside. If he manages to solve these temporary issue, he will be completely fine. Practical esperience proves that Black does so, as can be seen from the many games I'm going to quote below. Sorry if this collection of games is a little difficult to digest - but as I've explained in the introduction, 9...b5 is full of theory!

Tal Memorial, Moscow (rapid) (2.5)

[Richard Palliser]

1.d4 Nf6 2.Nf3 g6 3.Bg5 Bg7 4.Nbd2 c5 A critical counter. **5.e3**

[Solid and sensible. The main point is that 5.Bxf6 Bxf6 6.Ne4 Bxd4 7.Nxd4 cxd4 8.Qxd4 0-0 is fine for Black - see the Archive.]

5...cxd4!?

[A new move for us. We've previously considered 5...d6 , reaching after 6.c3 0-0 a position which can come about from a few different move

orders, and now 7.Bd3 a6 8.0-0 Nc6 9.Re1 was the course of Sasikiran-Cori Tello, Benasque 2016.]

6.exd4 b6 Svidler wants a double fianchetto...or perhaps here too he wants to deploy the trendy ...Ba6 concept. **7.c3**

[In the subsequent blitz tournament, Svidler was happy to repeat his play. Artemiev-Svidler, Moscow (blitz) 2018, deviated with 7.Bd3 Bb7 *(7...Ba6!? 8.c4 0-0 9.0-0 d5* should be fine for Black,*;* but after *7...Ba6* perhaps following *8.Bxa6 Nxa6 9.0-0 0-0 10.Re1* White can hold back on c2-c3 and quickly push a2-a4*)* 8.0-0 0-0 9.Re1 d6 10.Qe2 Re8 11.Ne4 Nbd7 12.Rad1 Bxe4 13.Bxe4 Nxe4 14.Qxe4 Nf6 and Black was very solidly placed.]

7...0-0 8.Bd3 Ba6

[A freeing exchange, but it will be interesting to see if 8...Bb7 might have been Svidler's prepared improvement when he repeated the line.]

9.Bxa6 Nxa6 10.Qe2!?

[A new move and a logical one at that. Previously, 10.0-0 Nc7 11.Re1 d5 *(11...d6 12.Qe2 Re8* looks more sensible, although *13.a4* may retain a nibble *)* 12.Ne5 Re8 13.f4?! had been seen in Schumacher-Cuellar, Haifa Olympiad 1976, when the thematic Ne4! would have equalised.]

10...Nc7 11.h4!? Very Mamedyarov and we shouldn't forget either that this was a rapid game. **11...b5?!**

[Unfortunately for Svidler, while White is opening lines, Black won't with his minority attack. As such, 11...d6 was necessary when 12.h5? *(12.0-0-0 Re8 13.Kb1 h5* leaves everything to play for*)* 12...Nxh5! is on, and if 13.Bxe7 Qd7 14.Bxf8 Re8 15.Bxg7 Rxe2+ 16.Kxe2 Kxg7 which doesn't look too great for the rooks with the white king rather floating about.]

12.h5! b4

[Now 12...Nxh5? 13.Bxe7 works as the black queen lacks a square to step forward to.]

13.hxg6 hxg6 14.c4 The problem for Black: the h-file is open and he lacks counterplay. Svidler now finds his only real chance, a central counter. **14...Ne6 15.Be3 d5 16.c5 Ne4 17.0-0-0 f5?**

[Such a Stonewall approach might have worked in Schumacher-Cuellar, but it badly fails to cut the mustard here. 17...Qc7 was a better try when White is better, but at least Black is fighting, as shown by 18.Rh4 *(18.Nxe4?! dxe4 19.Ne5* now runs into *Nxc5! ,;* but *18.Kb1* would be quite a sensible time-out*)* 18...Nd6 19.g4 Qa5! when 20.cxd6? *(20.Kb1 Qb5 21.Ng1 Qxe2 22.Nxe2 Nb5 23.Nf3* is the cold, calm way to maintain an edge*)* 20...Qxa2 21.d7 Rfc8+! 22.dxc8Q+ Rxc8+ 23.Nc4 dxc4 24.Kd2 c3+ would not spell good news for the white king.]

18.Nxe4 fxe4 19.Ne5! Pinpointing the main weakness: g6. **19...Rf6**

[This doesn't really help, but already good advice for Black is rather hard to come by as 19...Nxc5 20.dxc5 Bxe5 runs slap, bang, wallop into 21.Qg4 Rf6 22.Rh6 , and if Kf7 23.Rh7+ Kg8 24.Rdh1 Rc6 25.f4! .]

20.Qg4 Nf8 21.Bh6 The attack is simply far too strong. **21...Bxh6+ 22.Rxh6 Qc8**

[Svidler doesn't wait to be shown the

brutal 22...Qc8 23.Qh4 Kg7 24.Rh1 .]

1.e4 Kritz,L **1...c6 2.d4 d5** Die Caro-Kann-Verteidigung sieht heutzutage wie eine uneinnehmbare Festung aus. Zusammen mit der Russischen Partie sind das die zwei Eröffnungen, die den Weißspielern die meisten Probleme stellen. Doch im Vergleich zu Russisch erlaubt Caro-Kann eher auf einen Konter zu spielen. **3.e5!** Das ist streng der einzige Weg, auf einen Eröffnungsvorteil zu spielen. Die Hauptvarianten sind ausanalysiert und bringen Weiß nichts.

[3.Nc3 Die "klassische Hauptvariante". dxe4 4.Nxe4 Bf5 5.Ng3 Bg6 6.h4 h6 7.Nf3 Nd7 8.h5 Bh7 9.Bd3 Bxd3 10.Qxd3 e6 11.Bf4 Qa5+ 12.Bd2 Bb4 13.c3 Be7= Die Erfahrungen der letzten Jahre haben gezeigt, dass diese Stellung, die fast forciert aufs Brett kommt, ausgeglichen ist.]

8.c3 d6 An interesting psychological moment. White had the courage to allow the Marshall Attack, but Svidler, one of its main adherents at top level, decides to return to the positional paths of the closed Ruy Lopez. In doing so, he might have been inspired by his countrymen Morozevich' successes, obtained in the Zaitsev Variation just days earlier in Biel.
9.h3 Bb7 Svidler prefers the classical move order, though.

Bb7 12.Nxc6 Bxc6 13.e5 Nd7 14.Nf3 c4 15.Bc2 b5 16.h4 Nf8 17.Bf4 already beginning to spell some trouble for the black king in Sedlak-Sredojevic, Budapest 2017.]

8...Be7!? A new move for us and quite a striking one - Svidler simply abandons the battle for e5. Black also has:

[a) 8...a6 9.Bxc6 bxc6 10.Qa4

is a position we've considered a fair bit over the past year or two, and Bxg3 *(10...Rb8 11.Qa3!? Qxb2! *(12...Qxc5?* was preferred in Alvarez Fernandez-Marrero Cardenes, Las Palmas 2017, when *13.g4!* would have been surprisingly strong, as shown by *Nd7 14.g5 Re8 15.Qh4 Nf8 16.Ne5)* 13.0-0 Qb5 14.Qa3 is a new idea, playing against Black's restricted bishop. Matters are hardly at all clear, however, and after Nd7 15.Nb3 a5! 16.Nfd4 *(16.Rfc1 Ba6 17.Rab1* might be safer, if still fine for Black *)* 16...Qa6 17.Qa4 Ne5 18.Nf3 Black could have seized the upper hand in Tabatabaei-Zarubitski, Ahmedabad 2017, with Nd3 followed by ...e5.]

[b) 8...Bxg3 9.hxg3 continues to but help White, with Qd6 10.Bxc6 bxc6 11.Ne5!? *(11.Qc2* would be more circumspect, and if *cxd4 12.cxd4* , restraining a second ...c5*)* 11...cxd4 12.exd4 c5 13.g4 cxd4 14.cxd4 h6?! 15.g5! hxg5? 16.Qf3 g4 17.Qf4 Rd8 18.Rh8+! Kxh8 19.Nxf7+ was curtains in Ju Wenjun-Dzagnidze, Huai'an (blitz) 2017.]

[c) Likewise, 8...cxd4 9.exd4 Qc7 10.Qe2 Bd7 wasn't too impressive from the much lower-rated black player in N.Pert-Bailey, British League 2017, where 11.Bd3 Ne7 12.Ne5 a6 13.0-0 b5 14.a3 Rab8 15.Rac1 Bc6 16.b4! Nd7 17.Nb3 left Black being outplayed.]

9.Qb1!?

[A creative response and novelty. I can't see too much wrong with 9.Bd3 though. We are now in a ...Be7 type of London where White has played the slightly unusual Bf4-g3, rather than h2-h3 or Ne5. That means that Black has Nh5 when 10.a3!? *(10.Ne5 g6* feels very solid for Black *)* 10...h6 11.b4 cxd4 12.cxd4 Nxg3 13.hxg3 Bf6 14.b5!? Na5 15.0-0 Bd7 16.Qb1 gave White a decent enough type of Exchange Slav position, although here Black must also have been OK in Kamsky-Goryachkina, Sochi (rapid) 2017.]

[As such, one might also consider 9.h3 , but then Qb6 is a little annoying. It will be interesting to see how Kamsky meets 8...Be7 next time he faces it.]

9...Nh5 Once again trying to hunt down the bishop-pair, but Naiditsch finds a way to prevent Black from bagging it.

10.dxc5 Bxc5

[10...Nxg3 11.hxg3 h6 12.b4 Bf6 13.Qb3 shouldn't offer Black quite enough for his pawn.]

11.Bh4 Be7 12.Bxe7 Qxe7 13.c4 Both sides have the occasional oddly-placed piece, but fairly normal contours for a 1 d4 d5 position are also evident and after Black's next, a symmetrical structure becomes pretty likely. **13...Qc5 14.0-0 dxc4 15.Bxc4 Nf6 16.Rc1 Qe7** Svidler clearly likes having pieces on e7. Black has lost a fair bit of time, but he is, of course, extremely solidly placed. **17.a3 Bd7 18.b4** I can't see a better plan for White than this, but Svidler now defends well and keeps White's small edge well within check. **18...Rfc8! 19.Bd3 h6 20.Qb2**

[20.b5!? Na5 21.Qb4 was worth a thought, but after Qd8 22.Ne5 Nd5 23.Qd4 Be8 Black is fine.]

20...Nd8!? A little defensive, but why not? After all, Black wouldn't mind trading all the rooks. **21.Ne5 Nc6!**
[Svidler is alert to following the same plan in blase fashion. Indeed, 21...Rxc1+ 22.Rxc1 Rc8?! 23.Rxc8 Bxc8 24.Qc2 Bd7 25.Qc7 would not be so wise.]
22.Nxd7 Qxd7 23.Bb5 Naiditsch tries to make his superior minor piece count for something, but once again his problem remains the same: Black is rock solid. **23...Qd6 24.Be2 Nd5**
[I'm not totally sure about this, though, and 24...Qe5 might well have been safer.]
25.g3
[25.Nc4! Qd8 26.g3 followed by Bf3 would have given White definite chances of a lingering, Catalan-type nibble.]
25...Qe5 26.Qxe5 Nxe5 27.Ne4 Rd8 Keeping everything covered. Black is OK once again, although Naiditsch continues to probe. **28.Nc5 b6 29.Nb3 g5!? 30.Ba6** Bagging the c-file. Black has the d-file, but White can plug that. Perhaps Svidler's last was just a little too creative. **30...Rd7 31.Nd4 Rad8 32.Rc2 Ne7 33.Kf1** It's not trivial here for Black to sit. White will place his king on e2 and then look to advance on the kingside. As such, Svidler elects to break out. **33...Nf5! 34.Nxf5 exf5 35.Bc8** Winning a pawn, but Black had no doubt seen this coming. **35...Rd2**
[35...Rd1+!? 36.Rxd1 Rxd1+ 37.Ke2 Ra1 38.Bxf5 g4 would have been similar. Black's grip and activity should give him enough for the pawn.]
36.Bxf5 Rxc2 37.Bxc2 Rd2 38.Bd1
[White wants to keep Black's knight at bay and a time scramble was in full flow, but 38.Ra2!? might have improved, and if Nf3 *(38...Nd3? 39.Bb3* forces the rooks off*)* 39.g4! *(* avoiding the sort of clamp reached after *39.h3 h5 40.Bb3 g4! 41.h4 Kg7)* 39...Kg7 40.h3 Kf6 41.Bb3 Rd3 42.Ba4 , although even here White would have to play well to generate any definite winning prospects.]
38...g4! Clamping and cramping. **39.Be2 Kg7 40.a4 Rb2 41.b5 h5** White finds himself far too restricted to be able to make any progress whatsoever. **42.Rd1 Nf3 43.h4 Ra2 44.Bxf3**
